Hon. Adam Beck Said in Add ressing Boards of Trade, Addition to Supply is Becomin g Imperative—Believes Government Will Eventually Control Telephone System.

The announcement that he hoped to place a scheme before the Ontario Government whereby the Hydro-Electric Commission would secure at least a quarter of a million additional horsepower for peak-load purposes, was made by Hon. Adam Beck in addressing the Associated Boards of Trade at the banquet in the Prince George Hotel last night,

The speaker referred to the fact that the consumption of hydro power had become so great that the limit of the present production was being approached, and this fact made it necessary that means be taken to secure a larger supply.

TELEPHONES ALSO.

After tracing the development of the hydro system, including the radial lines to be operated by the people's power, Hon. Mr. Beck said he had a vision of the future when hydro power would be used all over the province wires. The cable connected the troi of some public service commis- nent actor from England, who comes for heat, lighting and operating radials. He also saw the time in prospect when telephone wires would be strung on hydro poles, thereby suggesting future public policy of control of the complete telephone system of Ontario.

## PUPILS DETAINED AFTER SCHOOL FILED THRU SMOKE AND FLAME ALL REACHED STREET IN SAFETY

### Dashed Cup of Water Over Beloved Table

"Oh. my poor old table, I've used it for more than twenty years!" cried one of the oldest teachers at the Lansdowne school in the midst of the hustle and bustle of the fire yesterday after-noon. After seeing that all the children of her room were safely in the fire line, the teacher hurried back upstairs. and seizing a cup of water, dashed its contents over the beloved piece of furniture in the hope that it might resist the ravages of the flames. Then she herself gathered up her hat and coat and hur-ried from the burning build-

The five hundred or so pupils under detention till 4 o'clock, upon hearing the fire signal, marched out in orderly fashion without a sign of panic. The estimated loss is \$40.000.

Lansdowne Public School

Completely Gutted Yester-

The cause of the fire is unknown It s believed to have started in the south wall, between the kindergarten n the ground floor and the room imnediately above it. In some quarters insmiths working on the new annex are blamed for the fire, while others give defective wiring as the cause.

Boys Gave Alarm. Herbert Terry, a lad of about 14 years, was the first to notice smoke and gave the alarm. Standing outside the premies with some comrades, the lad noticed a slight column of smoke coming from the south wall, below the window of the second storey. He notified a police constable, who turned in the alarm, while another lad ran into the school and informed the principal. A third ran all the way to the College street fire ball and notified the fire-

men personally. Parents Were Anxieuz Within fifteen minutes of the outbreak of fire, dozens of anxious par-
