This company is organized to engage in the making of building brick, terrs cotts, fireproofing, sic the demand for brick is greater than the supply and there is need of another factory to make feally to use inferior brick probably endangering the safety, and assuredly endangering the darability, of the buildings so constructed. The Canada Brick and Fireproofing Company's property consists of 150 adres, and contains a rery the buildings is o constructed. The Canada Brick and Fireproofing Company's property consists of 150 adres, and contains a rery subble and practically inextisustible deposit of shale day and building stone. The deposits in this property are of such a nature that the bast bricks, with a density and hardness be made the year jound, whiter as well as summer, as the company will have a thoroughly tested and product, the low cost at which obviates all difficulties. No such opportunity has come to invest in product, the low cost at which the Canada Brick that Can be made at a very low cost. Bricks can be indering the many years and considering the unsupplied market, the attractive prices for the product, the low cost at which the Canada Brick that Can be made and the well-known ability of the managing director of the company, this opportunity to invest is one of the best this company has ever

## THE LOW CAPITALIZATION

This company could easily have been incorporated for \$1,000,000.00, but to enhance the actual value of the shares, and to make the returns on the shares of practical consequence for all future time, the capital failed was made small in comparison with other flotations, but large chough to give ampla capital, pay all charges and put up a three-unit plant, fully equipped with the most up-to-date. fastest and best attekamaking machinery, and is supply plenty of working capital. We recommend this stock to all seeking safe reliable and profitable investment.

to all seeking safe, reliable and prontable investment. The plant will be located in the Township of Esquesing, in the County of Halton, and will have a capacity of 180,000 bricks for day. The present sale is to provide funds for completing the contract for the installation of the works of the Company, and for working capital. The contracts with the Company may be seen during business hours at the Imperial Trusts Com-pany of Canada, Toronto.

### PROFIT-SHARING ARRANGEMENT

Preferred stock, will share all dividends in excess of 6 p.c. in the following proportions: For every 1 p.c. extra haid on the Preferred. 3 p.c. is to be haid on the Common. For example with the Common stock reacters 3 p.d. Preferred will receive 7 p.c. After this point of dividend sharing has been reached any additional dividends are to be shared equally by both Preferred and Common. The Preferred is also "Preferred" as to return of capital. Two shares of Preferred stock carry s bonus of one share of Common.

### PROPERTY

The property condists of 180 acres of land in the Township of Esquesing, in the County of Halton, containing valuable deposits for the purpose of the Company. This was selected after careful investiga-tion of many much-praised deposits in different localities. 100 acres contains clay and shale and 50 acres contains a valuable deposit of building stone, known as "Credit Valley" stone, which is in great demand, and in itself alone should realize a good profit for the Company. There is an unfailing stream of, water through the property, affording abundant water for the Company's operations.

### TRANSPORTATION AND LABOR

The railway running, through the property gives excellent transportation facilities, and as the property is Situated in the same shipping sone as the Milton Terra Cotta, Halfon and Port Gredit Comsurrounding towns. The Company propose to build workmen's houses within a short distance of the plant. Following is a report made by S. J. Plant, Ceramic Engineer and Clay Specialist-an expert in the appraising and testing of clay deposits: Gentle Gentlemen: Toronto, May 8th, 1912. I have made a personal examination of the property containing 150 acres in the Township of Esquesing; in the County of Halton, which is about five miles north of the Town of Georgetown, upon which it is proposed that the works of the Canada Brick and Fireproofing Company, Limited, are to be placed. Esquesing: In the Country of that the works of the Canada Brick and Fireproofing Company, Limited, see to be placed.
There is upon the said land a very large deposit of red shale, which, I believe, runs to a depth of 200 feet, and is practically inexthaustible. I have tested the shale which lies near the surface, also at a depth of two feet, eight feet and fifteen feet. Is works smooth, dries sound and burns to a metallic hardness, and is of such plastic consistency as makes it suitable for the manufacture of high-class front brick, as well as an excellent quality of ordinary building brick, together, with fire-proofing either porous or dense. It is also suitable for architectural terra cotta, and ornamental roofing tiles, conduiting, etc.
Upon one corner of the grouperty is about forty acres of stone, which lies in a stratified formation. This stone is swat is commonly known in Torointo as the Credit Valley stone.
A spring oreck runs through the western part of the farm, sufficient to supply water for manufacture of the farm sufficient to supply water for manufactures of the canada never been known to run dry. At the pressent time the water is abundant.
The Grand Trunk Railroad runs through the property, and is located conveniently for all switching arrangements.
The Canadian Pacific Railroad have a line staked out through this property west of the Grand Trunk, about 1000 yaxds running parallel with it. I have no doubt when this line goes through you could get a switch from them that would give you additional railway accommodation to all points.

Sealed tenders, marked "Tender for barn," addressed to the undersigned, will be received at this Department up to noon on Saturday, June 29th, for the construction of Dairy Barns, to be inceted on the grounds of the Ontario agricultural College, Guelph. WEST LAND REGULATIONS.

NT parson who is the sole head of a family, or any male over is years a may homestead a quarter section of alable Dominion land in Manitone Ser

available Dominical a quarter section satchewan or Alberta: The application must appear in person at the Dominic Lands Agency or Subtagency for the di-rict Entry by proxy may be made a thy agency, on certain conditions b ather, mother, son, daughter, brother o later of intending homesteader. Duties.—Six months' residence upon an ultivation of the land in each of thre ears. A homesteader may live within ine miles of his homestead on a farm t at least 30 acres solely owned and cupied by him or by his father, moth , son, daughter, brother or sister. In certain districts a homesteader in bod standing may pre-empt a quarter-ction alongside on alongside his homestead.

Duties -- Must reside upon the he atead or pre-emption six months in of six years from date of homestead to

The rapid growth of the City of Toronto and the extraordinary building activities in the suburbs and the surrounding districts, which will doubtless continue for many years, has caused a domand for brick, freproofing and clay products in excess of the capacity of the brick plants that are in a location to supply the city and surrounding country. All the present brick companies in Ontario are taxed to their utmost, and much delay has been caused in building operations owing to the inadequate supply of brick, and in some cases it has forced owners to abandon building operations entirely.

### ESTIMATED EARNINGS

The earnings of the Company are estimated on the basis of a profit of \$2.50 per thousand bricks. The average cost per thousand, as estimated by the managing director of the Company, is \$5.00. In this are included selling, operating and all incidental costs of production, and as the Canada Brick and Fireproofing Company, Limited, are installing one of the most modern and up-to-date plants, both for handling and manufacturing bricks, this cost should be materially reduced.

### MANAGEMENT

The Company has secured the services of S. J. Plant. Ceramic Engineer and Clay Specialist. He has been associated with the brick business all his life, in the manufacturing of all classes of brick and high-class clay ware, both plain and ornamental, and has a thorough knowledge of the construction and erection of brick plants.

Samples made from shale off the lands of the Company may be seen at the offices of the Standard Bond Co. Wire-cut brick will be manufactured by the Company equal in appearance to pressed brick, and at no greater cost.

Applications may be sent in by telegram at our expense, and where application blanks are not available, a letter stating the number of shares desired, and a deposit of \$1 per share for the number of shares applied for, will be sufficient. Applications will be considered in order received and remittance for applications in excess of issue will be returned.

ADDRESS ALL COMMUNICATIONS for particulars, information, or for shares and for expert re-ports on the property, to the Standard Bond Company, Standard Bank Building, King and Jordan Streets, Toronto, Canada, and make cheques payable to the Trustees. The Imperial Trusts Co. of Can-ada, Toronto, Canada.

Interim receipts will be issued by the Trust Company pending the issue of the regular stock certi-ficates, which will, together with the bonus stock, be delivered on the completion of payments.

Three per cent. w'll be allowed on all payments made in full. The right is reserved to reject applications and to stop receiving applications at any time.

STANDARD BOND COMPANY Standard Bank Building, Cor. King and Jordan Sts., Toronto, Canada
