The lineman had left his horse standing close by and when the wire dropped it fell across the back of the poor brute. The horse tumbled in a heap to the ground and was dead before the lineman could descend his ladder and reach the animal's side. Bice made an effort to save his horse, and it was in doing this he was nearly shocked to death. He did not wait to take the usual precautions against the current, but in his hurry to save the horse he attempted to pick up the wire with a pair of pincers. The current knocked him down and stunned him pretty badly, but he has been fortunate in that the electricity had not finished him as it had done the horse at his feet.
