# My Free Electric Belt

Never before has another person made a free offer such as this. I do not distribute cheap samples broadcast, but am daily sending out dozens of my full power Dr. Sanden Electric Belts absolutely free of charge, and they are the same in every respect as though full cash prices were paid. The proposition is simple. If you are ailing, call at my office and take a Belt home with you. Or, if at a distance—no matter where—send your name and address, and I will at once arrange to deliver to you one of my Belts, with suspensory or other attachment needed. Use same according to my advice until cured, then pay me—many cases as low as \$5. Or, if not cured, simply return the Belt, which will close the transaction. That's all there is to it.

If you prefer to buy for cash, I give full wholesale discount.

Brokers were inundated with orders before the opening of the exchange and a much larger business would have been transacted if conformed to the bids made. ## Buy Cobalt Stocks Now

and you cannot help but make big profits within the next few months.

We have only to refer you to the record of shipments for this year, made by the good properties, to substantiate what we say, and they go to show that the people purchasing COBALT STOCKS will receive millions in dividends alone, to say nothing about the advances in prices which the dividends, with frequent bonuses, will cause.

We advised you to buy these stocks some months ago, and all these stocks have had good advances, but they are going very much higher. To participate in these good profits, you should buy NOW.

These are what we recommend you to purchase, and if you want our reasons, write us, and we will gladly tell you.

Buy "Temiskaming," "Crown Reserve," "La Rose," "Silver Leaf" and "Nipissing," which will sell much higher within the next six months. We devote our attention to COBALT STOCKS entirely, and will guarantee prompt service in execution of orders.

Write, phone or wire us. J.M. Wallace 6 75 Yonge Street Toronto

A week ago I advised the purchase of both of these stocks. During the past week Crown Reserve advanced over 30 cents per share. Tem, advanced about 15 cents per share. It looks as if Tem. would reach 90 cents or \$1.00 within the next few weeks.

GOSHEN, N. Y., Aug. 28. — After spending two sleepless nights in the jail here on the charge of beating his wife, Ferdinand Pinney Earle of "affinity" fame, was released this morning on \$2000 bail.

"I am going to find my wife no matter where she is. I know that if I can talk with her for ten minutes she will forgive me and everything will be all right again," he said.

Fair harvests in the west, average crops in Ontario, and a general trend toward better times, would seem to mean that the public can spare some money for good investments.

Cobalt Mining Stocks during 1966 and early 1907 were entirely too high and many lost money by the inevitable shrinkage due to the depression and overvaluation. The spring of 1908 saw most of the good stocks a little below their real value; and we predicted a gradual rise in prices.

The real value of the camp as a silver producer is now established; and large dividends have been paid recently, which show a better earning for money than any industrial stock on the markot. We believe that this increase in values will go on gradually for some months yet, followed by a possible rapid rise in some cases.

Other properties will be put on a dividend basis shortly.

We say, buy "La Rose" "Trethewey," "Nipissing," "Silver Leaf," "Nova Scotia" and "McKinley and Darragh" at once, as they look sure profit-makers within 90 days.

There are many others which service in any active stock.

The insiders have been making money lately on mining stocks. New is the time for the public to come in.

Do not wait until the profit has all been taken.
