THE WORLD LOOKS DARK
To the Dyspeptic. How to
Make It Bright.

Father Morrissey, the learned priest-physician, realized that many of the difficulties and troubles of this world are due to indigestion. He believed that to get a proper mental and spiritual attitude, a normal digestive apparatus is very helpful. The good Father therefore gave much study to the important question of the stomach.

His famous prescription, "No. 11," for dyspepsia and indigestion, consists of simple tablets cleverly compounded from the materials in Nature's laboratory. Each tablet will perfectly digest a full meal of 15 1/2 pounds of food.

Father Morrissey's "No. 11" has brought ease and continued health to thousands of sufferers who had previously tried other remedies in vain. It instantly relieves and in due time restores the stomach to full vigor.

If you suffer at times or regularly from a sick, sour, dyspeptic stomach, try No. 11, and see how quickly you can again enjoy hearty meals, and how bright the world looks once more.

In convenient flat boxes at 50c. each. Get a box from your dealer, or from Father Morrissey Medicine Co., Ltd., Chatham, N.B.

Farming By Lightning

Many and diverse are the practical uses to which electricity is being put in these modern days. A Russian investigator, Professor Lemstrom, of the University of Helingsfors has been conducting a series of experiments in England which promise to demonstrate the utility of electricity in its application to agriculture. He has conducted electricity by a net work of wires about fields of growing crops and claims to have increased their productivity enough to pay for almost half of his electric installation in the first year. The increased yield of wheat was 45 per cent. of corn, from 35 to 40 per cent.; of potatoes, 20 per cent., of strawberries, from 50 to 125 per cent., and of beets, 26 per cent. Prof. Lemstrom got his idea from the Far North, where he suspected that the electrical conditions stimulated the rapid growth of summer vegetation. His experiments were begun in England and Germany eight years ago and seem to have been conducted with great thoroughness, a field electrically treated, being put in close comparison with a field of the same size and under the same conditions except for the application of electricity. If the plan works when applied on a large scale, it should, an American commentator thinks, be used successfully in assisting the effort which various Eastern railroads and the New York Produce Exchange are making to revive farming on the deserted but once populous hill sides. All through New England and the Middle States there are water powers, few of which have been utilized. Some of these are on brooks too small to have been useful before the application of electricity to industry. Now, all through the hill country will be found ingenious farmers who have hitched a dynamo to a mill wheel, turned by a little brook close by, and have utilized the combination to light their houses and barns with a luxury and convenience not dreamed of until lately, to turn the separator, churn and butter, saw the wood and cut up the ensilage. The men who are raising money to stimulate agriculture on such farms, might find it profitable to invest some of the money in experiment stations after the Lemstrom.

Unnecessary

A new qualified judge in one of the small towns of the South was trying one of the first criminal cases. The accused was an old darky who was charged with robbing a hencoop. He had been in court before a similar charge and was then acquitted.

"Well, Tom," began the judge, "I see you in trouble again."

"Yes, sah," replied the darky, "the last time, Judge, you was ma lawyer."

"Who is your lawyer this time?" answered Tom, "I'm going to tell the truth."

The story is told of a certain town in the West, which had gone dry, that a stranger applied at the hotel for a drink of whiskey. He was told that it could not be sold to anyone unless bitten by a rattlesnake. Upon enquiring whether there were any rattlesnakes in town, he was given the name of a man who had one. But said his informant, there's no use in your going there, for that snake's engaged for ten weeks ahead."

Temporary distress in children calls for the simplest treatment.

Kitty's Coleraine.

As beautiful Kitty one morning was tripping
With a pitcher of milk from the fair of Coleraine,
When she saw me she stumbled, the pitcher tumbled,
And all the sweet buttermilk watered the plain.
"O I, what shall I do now twas looking at you now."
"Sure, sure, such a pitcher I'll ne'er meet again!"
"Twas the pride of my dairy: O, Barney McQuary!"
"You're sent as a plague to the girls of Coleraine."

I sat down beside her and gently did
Kiss her,
That such a misfortune should give
Her such pain;
A kiss then I gave her, and ere I did
Leave her,
She vowed for such pleasure she'd
Break it again.

Twice hay-making season, I can't tell,
The reason,
Misfortunes will never come single,
That's plain
For very soon after poor Kitty's disaster
The devil a pitcher was whole in Coleraine.

--Edward Lynght.

CHARACTER TOLD AT A GLANCE.

Character can be read in a person's carriage, it is claimed.
Business takes long strides, and has a quick, nervous gait.
Stubbornness waddles, pointing determinedly to self with every step.
Happy go lucky has a free and easy walk, throwing his arms and legs about as if hung on pivots.
Dignity is stolidly erect, measuring her steps carefully and looking neither to the right nor left. It is exaggerated style of correct poise.
Independence struts, positively tipping backward and swaggers his shoulders and tips his hat, saying in appearance, if not in words: "A fig for your opinion."

Prudence walks cautiously, with small, mincing steps.
Equisopose walks with such grace, with such ease, she attracts the eye of the admiring throng. Entering a room, she fascinates all about her.

It is the little things in a day which combine to make the events of lifetime. We cannot be too careful in guarding the training of the body. Some are blessed with beautiful faces; other with fine figures, may have luxuriant hair and a graceful carriage. Yet it is possible for each to possess, in part, all of these tributes of beauty, with study and practice.

And the last among these attractions is not the walk, for a woman is often judged by the manner in which she carries herself than in any other way known.

Labor in Demand

There is employment now for every man in New Glasgow. Carpenters, joiners, masons, plasterers, and all who have to do with building are in demand. Laborers, who are good with pick and shovel, are wanted on our streets and thoroughfares. Gardeners, who have some knowledge of gardening, trimming hedges, pruning trees, mowing and fixing lawns, laying out grounds, etc., are wanted. One man told me he could find employment for a dozen men at garden and lawn work. So many of our citizens are beautifying and making more attractive their gardens and grounds this summer that they find it difficult to get the necessary work done when they want it. However it is a good sign that this desire for improvement is so contagious and general; and we only hope that more capable men may be found to supply the demand for good gardeners and trimmers.

Women's Period of Pain.
Regularity of the system can only be secured by maintaining strong healthy circulation. If feeble, run-down, nervous, be sure that circulation is poor. The natural result is congestion that excites so severe a penalty. Besides being a foetal former and nerve tonic, Ferrozone adds additional vigor to the heart and ensures strong blood circulation. This is the only means of preventing congestions that cause pain, headache and nerve weakness. The whole system is renewed and fortified with strength, vigor and endurance. For girls and women nothing equals Ferrozone, \$5. at all dealers.

TIF BITS FOR LOCAL FANS.

Since Lynch told Bresnahan to "get in the game and earn his salary" the cardinals have been the sensation of the league. A good call-down does a man good.

The St. Louis Cardinals have been playing Fourth of July ball, says a fan who has just come from the West. They aren't travelling beyond their speed, but their at the top of it.

A few years ago umpires didn't dare come through the grandstands to the field.

"In the old days it was worth an umpire's life to walk anywhere near the fans," says Manager O'Connor.

"Some fan would have been sure to make trouble, and the umpires in those days used to sneak on the field and get off of it as quickly as possible after but things have changed.

Those squeeze plays are like four flash or the other fellow's umbrella all right, if you can get away with 'em.

These are off days for the paragon Rube Waddell in the hospital, Larry McLean on the water wagon and Rugg Raymond securely pinned to the straight and narrow. Diamond performers who do nothing by play baseball afford little food for the jester.

Rhody Wallace is past the juvenile stage, but nevertheless he is at the heat of his career and showing the way to all third base rivals in the American League. --Pittsburg. Some of the National League experts will have to wake up and pick the right ones.

The record for the present year as to number of men engaged in a game was made at New York the other day, when 28 cherubs took part--12 for Cleveland and 16 for the Highlanders.

In proportion to the number of hits he makes Lejocke has a smaller number of runs slow in running bases. His ratio is eight runs to 42 hits.

The Decey

"Notice," said the man to the person "that although I am in the front position there is always a \$5 bill on the collection plate when it comes to me. Is that the contribution of the man who takes up the collection?"

"Not at all," replied the person who believed in business methods, "that's our decey."

Farming a Loss

Ask any farmer how much each dollar he has received in returns cost him to produce. Ask him whether the expenditure of one dollar in capital and labor returned him \$1.10 or ninety cents.

He can't answer. The little title of the feller is a void so far as he is concerned and the part played in the production of an acre of corn by such means as rent, seed, interest and depreciation of machinery, man labor and horse labor, has never entered into his calculations. If he should sit down and figure out his losses in all the minutiae of detail that is necessary for the proper conduct of the business undertakings, mercantile or manufacturing, he might find that he was actually producing crops at a loss. A large percentage of American farmers, probably the majority of them, actually are producing foolstuffs at a loss on the basis of the science of modern business. Van Vleet Adling in Book-Keeper for June.

TRUTHFUL ADVERTISING THE BASIS OF SUCCESS.

Since the Ingredients Entering Peruna Are Known, Its Power as a Catarrh Remedy and Tonic is Understood.

COLUMBUS, OHIO.—The active ingredients entering the most popular household remedy in the world have been made known to the public. This means a new era in the advertising of popular family medicines—Peruna leads.

Peruna contains among other things, golden seal, powerful in its effect upon the mucous membranes. Cedron seed, a rare medicine and unsurpassed tonic. Cubebs, valuable in nasal catarrh and affections of the kidneys and bladder. Stone root, valuable for the nerves, mucous membranes as well as in dropsy and indigestion.

After a woman has been married she is always willing to admit that her husband doesn't know what he's doing.

Let Now See How They Are Wasting Money On Roads.

Amherst, N. B., June 24. A. W. Campbell, deputy minister of railways and canals, arrived in Amherst on a special train today, accompanied by members of the railway board and W. B. McKenzie, chief engineer of the I. C. R.

Mr. Campbell delivered a large meeting of citizens of the town and surrounding country tonight on the subject of good roads. He said that one of the chief objects of the railway board is to save money. He continued the present system of road making in this province and said it is a waste of labor and of money.

Str. Prinz Oskar Ashore At Flower Ridge, Floated

Montreal, June 24.—It is reported from Point Amour that the Prinz Albert of the Canada line, has been successful in her endeavor to tow the Prinz Oskar off the reef at Flower Ridge, on which she stuck, and where she has been fast for two days. Although she has a considerable quantity of water in her fore hold, it is believed that her bulkheads will prove strong enough to prevent any flooding of the after part of the ship, and as the Lord Statistoon will arrive here tomorrow with the most powerful pumping apparatus which exists on the coast, she may after all be towed into Quebec and saved.

Driver (on front) I wasn't always driving an ice wagon. I once owned a string of horses and was a diamond.

Weighter (on back) That's nothing. I used to own my own mansion and motor every day to bill time.

Boss (on sidewalk) Say, you fellows, stop letting off so much "hot air," will you? First thing you know you'll be in the ice and we'll go in short. --Chicago News.

Moncton Bookies on Carnival Week.

Moncton, N. B., June 24. Moncton is to have a carnival week, beginning Monday, August 8. This was definitely decided at a large and representative meeting of the greater Moncton club tonight. The meeting was unanimous in favor of the proposal and all entered heartily into forwarding the scheme. Committees for the different branches of the carnival were appointed.

The programme for the week was decided as follows:

Monday, Society parades, baseball, airship flights, band concerts.

Tuesday, Athletic sports, baseball, airship flight, band concerts.

Wednesday, Visit to oil wells, airship flight, masquerade ball.

Thursday, Visit to new I. C. R. shops, baseball, airships, band concert, fire works.

Friday, Visit to oil wells, horse race, airship.

Saturday, Labor parade, horse races, airship, band concerts, fireworks.

Statistics show that in the city of New York there are 25,000 women who by their labors support their husbands and families.

Local Salesman Wanted for St. George

and adjoining country to represent CANADA'S GREATEST NURSERIES

Special list of Hardly Tested varieties, thoroughly adapted for New Brunswick planting. Large and small fruits, ornamentals, shrubs, vines, roses, bulbs and seed potatoes.

A permanent situation for the right man: liberal inducements, pay weekly. Reserved territory, free equipment.

Write for particulars: STONE & WELLINGTON, Fruitful Nurseries (Over 800 acres) TORONTO, CANADA
