## HERSCHEL'S WEATHER TABLE.

For foretelling the Weather, through all the lunations of the Moon for ever.

If the new Moon, the first quarter, the full Moon, or the last quarter happens,		In Winter.
in the morning	Frequent showers	Rain. Stormy. Cold rain, if wind be west; snow, if east. Cold, and high wind. Snow and rain. Fair and mild. Fair. Fair and frosty, if wind north or north-east.

Observations .- The nearest the time of the Moon's change, the first quarter, fu and the last quarter, are to midnight, the fairer will the weather be during the seven days following.

2. The space of this calculation occupies from ten at night till two next morning. 3. The nearer to mid-day or noon the phases of the Moon happen, the more foul

or wet weather may be expected during the next seven days.

4. The space of the calculation occupies from ten in the forenoon to two in the afternoon. These observations refer principally to the Summer, though they affect Spring and Autumn nearly in the same ratio.

5. The Moon's change, first quarter, full, and last quarter, happening during six as the afternoon hours, i.e., from four to ten, may be followed by fair weather; but this is most dependent on the wind, as is noted in the table.

## BANK HOLIDAYS IN ONTARIO.
