

## UFO expert interviewed

By PETER KUITENBROUWER  
Brunswickan Staff

By a stroke of fate, the man who claims to be the "only space scientist in North America known to be devoting full time to flying saucers" has moved to Fredericton.

Stanton Friedman has worked on classified projects with NASA and the Pentagon, lectures constantly, has helped make movies and books, and is constantly on the phone all over the world. He married a Fredericton girl, and they moved here from the San Francisco Bay Area in September.

Walking into his office one encounters tottering piles of manuscripts and photographs, row on row of scientific books, and more boxes of data on the floor. Friedman waved it all away with disdain. "None of the books I have are good enough," he said. This is precisely one reason why Friedman is living in Fredericton: he wants to spend less time lecturing, and write his book, which he says will come out in 1982.

"An interesting UFO sighting," said Friedman, "is a report by a competent observer of strange phenomena in the sky or on the ground which the observer can't identify, which remain unidentified after investigation and whose appearance clearly indicates a manufactured object and whose behaviour indicates it was manufactured elsewhere than earth."

In fact, there are many UFOs sighted daily, most of them reported in small-town

newspapers. Most of these turn out to be explainable, Friedman said, but there are also some that are researched and confirmed, and become to Friedman cases of alien craft sightings.

Aliens have not attempted to communicate with us, or if they have, we're not aware of it, Friedman acknowledged. "The aliens don't seem to want to chit-chat with the big shots from planet earth," he said.

So why are they here? "I've thought of 29 reasons," Friedman said. "Perhaps they're graduate students doing research on a primitive species. From the alien viewpoint, we are a beautiful planet whose major activity is tribal warfare and whose resources are mainly used to feed the egos of the people in power."

Who would they talk to, anyway? he asked. There is no one who speaks for the earthlings.

"The aliens are concerned with self-preservation," Friedman said. "It was obvious in 1945 that earthlings would go to the stars, with the satellites and the atom bomb." So "they have to get data on us quickly. When we switch to lasers, we will have weapons that go 670 million mph instead of six thousand."

"I worked on a nuclear rocket propulsion project. We were building a motor this big," he said, stretching out his arms like a bragging fisherman, "that generated four billion watts of power. Incidentally, Point Lepreau generates 600 million watts."

"We're as close to going to the stars now as we were to going to the moon in the 50's," he said.

World governments, especially the US's know much more about flying saucers that they are letting on, Friedman said. This is one reason for public scepticism. There are secret projects to find out how they work, because the most important use for a flying saucer is military," he explained and "You can't tell your friends about what you learn without telling your enemies."

The physicist also said "Suppose there would be an announcement tomorrow by two very believable people - say Walter Cronkite and the Pope, that flying saucers exist. There would be an immediate push among the younger generation for a new view of ourselves as earthlings. No government wants citizens to know they're earthlings," he said, "because then governments would lose their power."

The researcher also blames public scepticism about UFO's on the media. "We're dealing with the story of the millenium, and it's being reported like Alice's tea party," he said. "Carl Sagan did an awful hatchet job on UFO's in his Cosmos series. I'm writing the FCC about it."

There isn't one full time reporter on UFO's in the US, he noted.

Friedman said the attitude towards UFO's will change in the generation of today's students, the first generation to be born during the space age. We'll go to the stars, he said, "If we adapt an earthling orientation. We have to change our attitude. Nationalism is the curse of mankind."

"Otherwise," he said, "we will all die in a nuclear holocaust."

The physicist will deliver an illustrated speech on flying saucers in UNB's MacLaggan hall, February 4th at 7:30 p.m. Admission is \$1 for students, and \$3 for others.

## Engineers host sleigh ride

Next Friday, February 6 you're all invited out to Mactaquac for a chemical engineering sleigh ride. The fun starts at 7:30 p.m. out behind the lodge, but if you need a lift out be in Rm. 033, Head Hall by 6:30 p.m. Just think you get all this for only \$2.00 and the lodge will be open later with food and anti-freeze.

Don't forget, Saturday, Feb. 14 is our annual St. Valentine's Day massacre, for further details see next week's Bruns.

## Campus Christian

By JIM POITRAS  
Agape Fellowship

A road means someone's been there ahead of you. And he left a path, a trail, a highway for you to follow - to make it easier for you to help avoid pitfalls, to keep you from getting lost. That's good to know.

It means that someone was concerned enough about your making it through successfully that he did something to help you. And that makes it a lot easier for you.

Have you ever thought, Wouldn't it be great if someone could blaze that kind of trail into what happens at the end of life? Then we wouldn't have to be afraid of what happens after death and of death itself.

Someone has. Jesus Christ came from eternity, was born of the virgin Mary, lived among men, died for the sins of all men - not for His own, for He never sinned - and then arose from the dead. He knows what it's like on the other side.

And He was so concerned about what happened to you that He left a road for you to follow - a straight and narrow road - so that you can travel it to be with Him throughout eternity. He told His followers, "I go to prepare a place for you."

When they asked Him how they were to get to that place, He told them "I am the way...no man cometh unto the Father, but by me." John 14:6. So if you want eternal life and a place in heaven, Jesus Christ is the way for you to get there - and He is the only way.

How do you know when you're on the way? "If thou shalt confess with thy mouth the Lord Jesus, and shalt believe in thine heart that God hath raised him from the dead, thou shalt be saved. For with the heart man believeth unto righteousness; and with the mouth confession is made unto salvation" (Romans 10:9,10)

This is the only way to happiness and spiritual wholeness, to peace, to freedom from guilt and sin. Jesus is the way - the only way for you. Won't you follow him today?

The Agape Fellowship is a group of Campus Christians meeting each Wednesday at 12:30 in Room 102 of the SUB. All are welcome to a time of praise, sharing, discussing and examining of the Christian faith. We are a group of believers working towards one major goal...Declaring Jesus Christ to UNB and we do not believe that the gospel will return void. For information or time of discussion please call Jim Poitras at 454-5626.

The Social Club now has an oyster bar. Oysters and lobster rolls are available.

## PART-TIME BOOKKEEPER WANTED

If you are a student who wants to work 12-15 hours per week and you have basic bookkeeping skills this position is for you. For more information contact Dave Campbell, Student Union Administrator at 453-4954 or drop into the SRC office Room 126 in the SUB.
