

ENTERTAINMENT'S REGULAR FEATURE ON CONTEMPORARY GRAPHIC FICTION.

CALUM JOHNSTON

Hi-Hoi! Once again I've managed to patch together enough of my cranium to spew out a few graphix reviews. Loads and gobs of good stuff this week. I can't keep up with it all. Quick note before I go off on my bent: any questions or queries on comix are welcome. Send to Cal Johnston c/o Brunswickan Rm. 35, SUB, UNB. Now, off we go!

The American

THE AMERICAN (Dark Horse -\$2.60) A real American hero or a front for a secret conspiracy to give the public a role model. Fighting terrorist insurgencies with a crew of F/X specialists and reporters mysteriously dying when they get too close make this an interesting read. ***

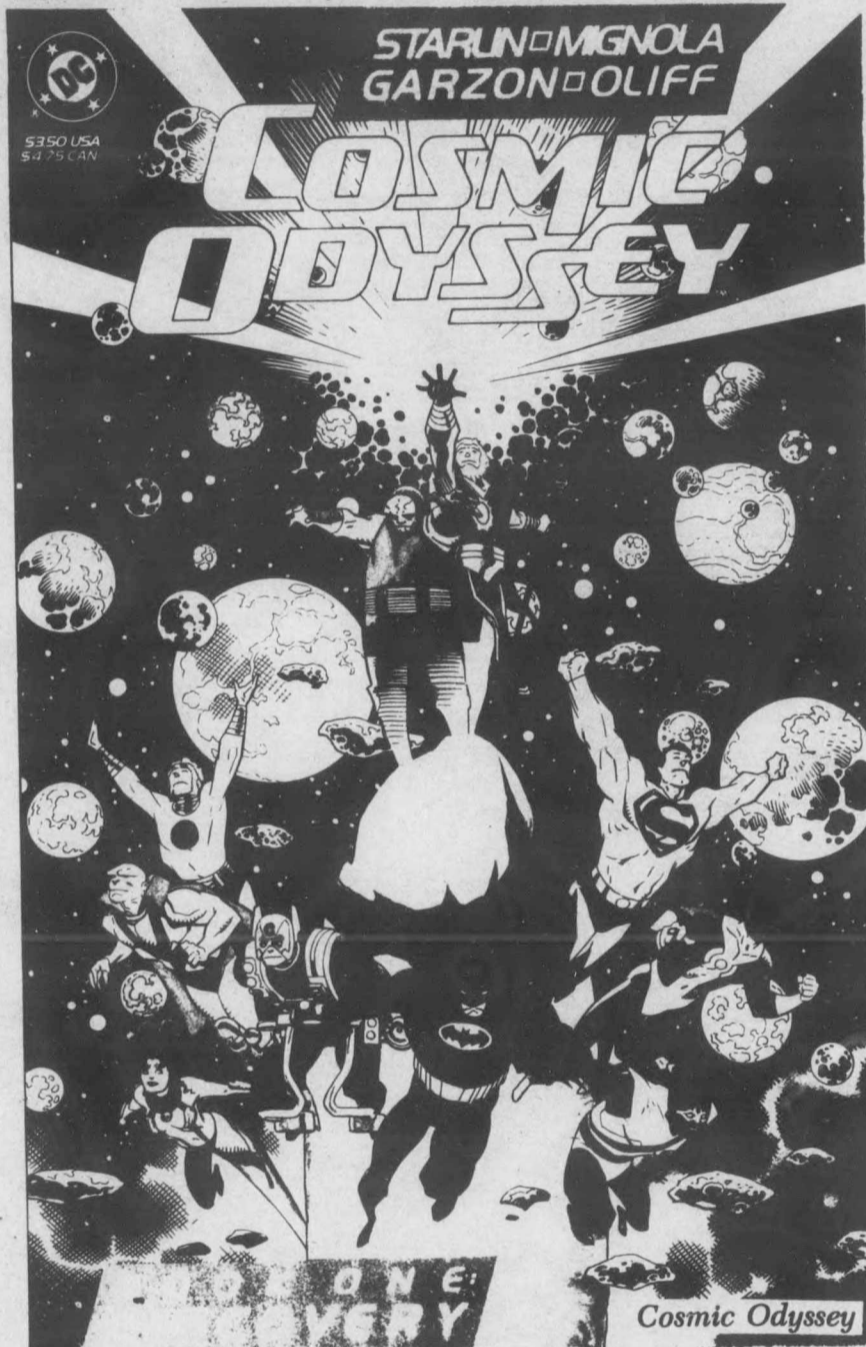

RATINGS:

****: Excellent or Rip-Roaring, take your pick.
 ***: Darn Close to Excellent.
 **: Worth the coverprice, but just that.
 *: Not completely bad, but save money and read someone else's copy.
 †: Unbelievably bad dog droppings.

V FOR VENDETTA (DC Comics -\$2.95) This was originally done in black and white in the British mag "Warrior" but "Warrior" folded before Alan Moore and David Lloyd had

finished this apocalyptic story of a future Britain under an Orwellian fascist government. This is a 10 part story that is being reprinted in full colour and issues 8,9, and 10 are new material created to, after over 4 years, finally end V For Vendetta. ****

GREDEL (Comico - \$2.25) Matt Wagner's devilish creation spreads its evil and corruption all over the world and down through time. Horror and S-F elements. Avant-garde stuff but has its ups and downs. ***

Cosmic Odyssey (DC Comics -\$4.75) A four issue miniseries that's perfect for sci-fantasy fans. Evil incarnate in the form of the "ANTI-LIFE EQUATION" attempts to col-

lapse the milky way. Gleaming gods, many super-heroes, and the best villain-Darkseid: coupled with moody impressionistic artwork make a very good read.***
