**CONFUCIUS SAY:  
"MAN WHO PUT CLEAN OIL IN DIRTY  
ENGINE SOON GET CRANKY CASE."**

You get an oil change. You put clean high-quality oil in your dirty engine. Then you start your car and drive away happy as can be. Question.

What happens to your nice clean oil now that it's sloshing around inside your dirty engine? You guessed it. Instant dirty oil. The stuff that robs

your engine of a longer, trouble-free life.

Don't put clean oil in your dirty engine. Use Kleen-Flo Engine Flush and Cleaner. You need its powerful cleaning agents because chances are you're changing your oil less often these days.

When Kleen-Flo Engine Flush and Cleaner is flushed through your engine,

it gets rid of all those built up abrasives. Like sludge, dirt and gum. So your engine lasts longer. And you get better mileage and performance from your car.

So change your oil now and don't forget to use Kleen-Flo Engine Flush and Cleaner. We say it's what your dirty engine needs. Confucius say so too.
