

"Brantford" "Roofing"

Cannot be excelled as a Warm Roof Covering for Bee Hives, it is impervious to dampness, is wind and frost proof and will keep the bees comfortable during bad weather.

Colonies housed in hives covered with Brantford Roofing, may be left out of doors during the winter.

Mr. Hurley, Publisher of Canadian Bee Journal, has used Brantford Roofing for this purpose—we refer you to him.

Send for samples and our instructions how to use

"Brantford" "Roofing"

This same material is well adapted for the Siding and Roofing of Barns, Sheds and other outbuildings.

Let us tell you more about it.
