

man at the depot was present on parade to witness the interesting ceremonial, and evinced their most cordial concurrence in the sentiments expressed by Major Berkeley, in praise of their late country's conduct, and that they were deeply sensible of the necessity for the observance of military discipline.

16th.—Dr. Bartley has arrived in the *Atholl* from Quebec.  
32nd.—Lieut. Col. Maitland and the officers in Canada have formed a subscription, for the purpose of erecting a monument at Montreal, to the memory of Lieut. W. G., who was so heroically murdered by the rebels at the beginning of the Canadian insurrection. This testimonial reflects much credit on both parties—showing the liberal feeling of the officers, and the very high estimation in which Lieut. W. G. was held; and his execution having been confided to the able hands of Mr. Westmacott, we have a guarantee that it will be worthy of its praiseworthy object.

43rd.—The detachment in command on Peter Heights, has received orders to hold themselves in readiness to embark for Canada. Captain Talbot, the senior Captain of the 43rd depot, is first on the list for this service.

74th.—Lord A. Lennox has taken the command of the depot at Beauport.

Recruiting on a most extensive scale is now going forward in no less than twenty-one Regiments of the Line.

SHIPPING INTELLIGENCE.

The *Opheus* packet has accomplished her last voyage, from Sabley Hook to Liverpool, in fourteen days.

The *St. Andrew* completed her passage from New-York to Liverpool under fifteen days, one of the quickest passages ever made by a sailing vessel between the two ports.

The regular sailing days of the steamship *Liverpool*, are fixed as follows:—  
From Liverpool to this Port: 1st March, 19th April, 7th June, 26th July, 13th September, 1st Nov. 20th Dec.  
From New-York to this Port: 5th Feb., 20th March, 14th May, 2nd July, 20th August, 8th October, 26th November.

INTERESTING EXPERIMENT: COMBINATION OF STEAM AND WIND.—A ship called the *Maria* of London, Captain Black, is now fitting out, in the West India Export Dock, with two locomotive steam-engines, and two sets of rollers, one on each side, for the purpose of propelling the vessel by means of paddles which are made to ship and unship, like coach wheels, and he put on or taken off without much trouble, while the ship is under weigh. The *Maria* is a vessel of 500 tons burden, built at Yarmouth, and has made a sailing voyage to Quebec and back, assisted by the power of steam. She is of the ordinary description of vessels of her class, and the engines and machinery are placed between decks, occupying a space of not more than 20 feet in length, by five feet in width on each side. The vessel is going to China, and the paddles are only to be made available during the calms and light winds, which it is well known are met with in certain latitudes on the East India and China voyages.

MELANCHOLY ACCIDENT AT SEA.—The *Windscales* arrived on Friday night from Quebec.—Three or four days before entering port, the ship was struck, during a hurricane from the south-east, by a tremendous sea. As soon as the decks were clear, the crew who had been forward, missed Captain Walsley, who had been washed overboard by the reflux of the waves, and perished. He was a young man highly esteemed by his friends and respected by the crew.

ANOTHER IRON STEAMSHIP.—London papers state that the British and American Steam Navigation Company have contracted with Mr. John Laird of Liverpool, (the builder of the iron steam vessel *Rainbow*, belonging to the General Steam Navigation Company) for an iron steam ship of 1,200 tons, to be called the *Atlanta*, and intended to run between London and New-York. It is expected that this ship will be able to make the passage in ten days.

FARMERS.

In the packet ship *Roseau*, sailed from New-York, Jan. 28th, for Liverpool.—Mr. Strang, of Quebec; Mr. Russell, of Montreal; Mr. Thomas Annot, (bearer of despatches,) of Quebec.

MARRIED.

At Point Levi Church, on Tuesday, the 15th inst. Mr. Joseph Bourassa, bachelor, to Miss Jeanne, eldest daughter of Pierre Gantin, Esq., all of that place.

In Montreal, on the 11th inst. Mr. Wm. Manuall, of that city, to Miss Mary Jane Dewitt, of Clatsangway.

DIED.

On Wednesday morning, at his residence in St. Roch, Mr. John B. Lamotte, aged 42, much regretted by his friends.

On the 11th inst. at St. Marie, N. Bruce, aged 31 years, Dame Julie Louise Taschereau, wife of R. A. Fortier, Esq. M. D.

BANKERS.

MESSRS DREWETT & FOWLER, Princes St

THE real and substantial advantages afforded to the Public by a regulated Establishment for the Assurance of Lives, and the sound basis on which these institutions are founded, are proved, incontestably, by their complete and continued success, and by the remarkable fact, that, in no instance, have they ever failed in their engagements, in consequence of an exhaustion of the Funds provided to meet the claims. So decided and so manifest are the benefits resulting from the system of Life Assurance in general, both in regard to the Provision it affords to Families in the event of premature death, and the Security it gives to Creditors for debts otherwise irrecoverable, that with every increase of information and intelligence, there appears to be excited, on the part of the Public, an increased desire to participate in its protective advantages. So sound and unerring also are the principles on which Life Assurance Companies are based, that, in other commercial difficulties and distrust on the one hand, nor pestilential maladies on the other, have ever yet affected their stability or impeded their successful progress.

ASSURANCES MAY EITHER BE EFFECTED BY PARTIES ON THEIR OWN LIVES, OR BY PARTIES INTERESTED THEREIN ON THE LIVES OF OTHERS. The effect of an Assurance on a Person's own life, is to enable a Property in Reversion, which can BY NO OTHER MEANS be realized. Take, for instance, the case of a person at the age of Thirty, who by the payment of 43 3s. 4d. becomes at once possessed of a considerable property amounting to £1000, subject only to the condition of his continuing the same payment quarterly during the remainder of his life,—a condition which may be fulfilled by the mere saving of a few shillings weekly in his expenditure. Thus, by the exertion of a very slight degree of economy—such, indeed, as can scarcely be felt as an inconvenience, he may at once realize a capital of £1000, which he can bequeath or dispose of in any way he may think proper.

Assurances may be advantageously effected on the lives of others, either for the purpose of securing loans or debts, or in any case where the party has an interest in the life of another, so as to be in any way prejudiced in the event of his decease. To creditors a Policy of Assurance affords a certainty, and in many cases the only means of security.—The debtor is too frequently unable to pay the premium for an Assurance on his life; and the creditor, to whom security is the main object to be regarded, may make the payment of such Premium the condition of his forbearance in not insisting upon the immediate payment of his demand. In the same manner the circumstances and prospects of a borrower, and the nature of the security he has to offer, are frequently such as to render it absolutely necessary for an Assurance to be effected in order to enable the lender safely to advance the amount required.

In addition to the published rates, an extensive set of Tables has been computed for Assurances; also for Reversionary Annuities, Endowments for Widows and Children, and for every possible contingency affecting human life, against which may be prudent or expedient to provide.

AMONG OTHERS, THE FOLLOWING IMPROVEMENTS ON THE SYSTEM USUALLY ADOPTED, ARE RECOMMENDED:—

1. The attention of the Public to a Table of increasing rates of Premium on a new and remarkable plan, peculiarly advantageous in cases where Assurances are effected by way of securing loans or debts, a less immediate payment being required on a policy, for the whole term of life than on any other office; and the holder having the option of paying a periodically increasing rate, or of having the sum assured diminished according to an equitable scale of reduction.

Officers in the Army or Navy, engaged in active service, or residing abroad, and persons afflicted with Chronic Disorders not attended with immediate danger, assured at the least possible addition to the ordinary rates, regulated in each case by the increased nature of the risk.

Ladies and others to whom it may be inconvenient to appear at the office, will be visited at their own houses, by one of the Medical Officers.

All claims payable within ONE MONTH after proof of Death.

No proof of Birth is required at the time a claim is made; the Age of the Assured, being in every case admitted in the Policy, cannot, under any circumstances, be afterwards called in question.

Policies effected by parties on their own lives are not rendered void in case of death by duelling or the hands of Justice. In the event of suicide, if the policy be assigned to a bona fide Creditor, the sum assured will be paid without deduction; if the policy be not so assigned, the full amount of Premiums received thereon will be returned to the family of the Assured.

Policies having become forfeited in consequence of the non-payment of the renewal Premiums, may be revived without the exaction of a fine, at any time within twelve calendar months, on the production of satisfactory evidence relative to the state of the health of the Assured, and the payment of interest on the Premiums due.

By these and similar Regulations, many of which are peculiar to this Establishment, it is presumed that the important object has been attained of rendering a Policy of Assurance as complete an Instrument of Security as can possibly be desired.

THE Subscriber having been appointed Agent to the above Company in this City, is prepared to receive proposals—and to give the requisite information as to the mode of effecting Assurances.

R. PENISTON.

Medical references.—Doctors MORRIS and SEWELL. Quebec, 31st Jan. 1839.
