

IS YOUR CHILD

BEING taught to play the Pianoforte properly? If not, we recommend that you investigate the **Progressive Series of Pianoforte Studies**, edited and written by Leopold Godowsky, Emil Sauer, W. S. B. Matthews, Frederic Lillebridge, and other noted musicians.

These Courses combine the theoretical and the practical, and are so graded that the lessons are interesting and of lasting value to the pupil.

The Canadian Academy of Music and the **Columbian Conservatories of Music** throughout Canada have adopted this method of teaching, and it is rapidly being introduced among teachers and pupils not connected with any institution.

If you are interested, a representative will call, or we invite inspection at our offices.
