

## APPARATUS for AGRICULTURAL HIGH SCHOOLS

The manufacture of Agricultural Apparatus is no longer an experiment with us. We were the **Pioneer Manufacturers**, first issuing a catalog in 1910. We saw the demand for Agricultural Equipment and conferred with the leading Agriculturists and the Experts of the Agricultural Department at Washington before adopting any designs.

We number among our large customers the Agricultural College of every State, the Agricultural Department at Washington, D.C., the Agricultural Colleges at Guelph and Saskatoon, and Macdonald College.

### SEND FOR CATALOG X

which contains sections describing apparatus for **Soil Analysis, Soil Fertility or Seed Culture, Meteorology**, a large list of **Lantern Slides** for Agriculture, and a valuable list of **Agricultural Text Books**, revised and brought up-to-date by an expert in Agricultural teaching.

Nos. 9288-9290.

### No. 9288 SOIL TUBES

These tubes are of brass tubing, 10 inches long, and so constructed that one style of tube may be used for all experiments. They have a bottom of cast brass, corrugated on its upper surface, and provided with a connection for rubber tubing. A small side tube near the top permits the tubes to be connected in series by means of rubber tubing, so that a constant water level may be maintained.

Each, Net \$1.00.

### No. 9289 TUBE RACK

This rack is especially designed to hold six No. 9288 Soil Tubes. The arrangement is such that the tubes are held securely and yet may be removed or replaced very easily.

Net \$1.50.

### No. 9290 SUPPLY TANK

This tank is of polished brass, and is intended for use with No. 9289 Tube Rack and six No. 9288 Soil Tubes for maintaining a constant water level.

Net \$2.00.

*Our Canadian Representative will instruct you as to duty free importations.*
