SOME FORTY YEARS AGO.

[Contributed.] As time rolls on, the years have gone, Some will say, how slow! Since Fredericton stood at the edge of the wood Some forty years ago.

But oh how fast those years have passed-To me its like a dream-While on this shore with many more I've floated down life's stream.

To you I will tell-I remember well When our first steam-whistle blew-How we ran with staves to kill the knaves While the woods re-eched through.

Your attention, all, I'd like to call : 'Twas something then quite new, 'Twas a grand event the time we went To our first exhibition in '52.

When work was done and market day come To town the folks did go.

They had to wait with patience great For the horse-boat was so slow.

You'd think that then commerce and me Were far behind the times; Men did their work and did not shirk. Though they had no railway lines.

Some of you know if it were not so I could not have my say. But we were young and happy then : Our hearts were light and gay.

At Christmas tide away we hied Hitch tandom to the sleigh. Speed along the road to a friend's abode, And spend a pleasant day.

Invention grew, steam-whistles blew. And first, but not the last, By ready hands and steady minds Our town was lit by gas.

Then came a time with stake and line News from afar did waft, The poles did rise towards the skies That brought the telegraph.

When that was done for quite a sum. We wanted something more Our next delight by day and night Was the locomotive's roar.

Then where you went, on business bent. The talk was time and rules, And what was done in seventy-one When we got our free schools
