The Tale of Perfect Time in a Watch

From Mainspring to Hairspring, between them lies the secret. The Mainspring is the power which transmits to the control and regulates the motion. The hairspring is most delicate, it is a thin part of a hair. (Impossible to imitate) Yet it is enough to interfere in the performance, so wonderful is the adjustment. Few friction from accumulating dirt; lack of oil, etc., destroy these perfect fittings. Do not let your watch run to ruin from neglect. Remember our business is the care of watches, and our opinion costs nothing.

Watch and Jewellery Repairs.

Send your Watch and Jewellery Repairs by Mail or Express and get the best Repair service in Newfoundland. Estimates given by return mail, and if not satisfactory, we return your work at our expense.

You Did Not

establish your home and its comforts without much outlay and may be some self-denial. And yet how easy and complete is the destruction of the best of homes when once fire gets the mastery. Prudent people protect their property by the liberal policies offered by my companies at their usual low rates.
