Solution of Yesterday's Puzzle.

What Doctors Know

"In this country it is, I am glad to say, absolutely untrue to say that 'Where there are three doctors, there are two atheists.' Our medical men know too much about religion as a health-giving power to disavow it." —Dean Inge, in a sermon preached at Cambridge.

Age of Fish Can be Told by Its Ears

Heretofore it has been impossible to tell the age of a fish with any degree of accuracy, but now Prof. W. J. K. Harkness, of the University of Toronto, says that by looking into the fish's ear one can tell its age.

In the internal ear of the fish there is a little bony pocket. In this pocket there is a tiny stone called an "otolith," which rolls about as the fish tips this way and that and helps him to know if it is right side up. As the fish grows older the otolith grows larger. Prof. Harkness has made a study of the rate of the otolith growth and can now tell from the size of this "ear stone" just how old the fish really is.

DYSPEPSIA

George S. Scally, of No. 75 Nassau St., New York, says: "For years I have been troubled with rheumatism and dyspepsia, and I concluded to try your pills. I immediately found great relief from their use. I feel like a new man since I commenced taking them. The dyspepsia has left me and my rheumatism is gone entirely."

Rabbits a Pest in Alberta

CALGARY, Alta., April 1.—The Jack rabbit has multiplied so rapidly in Alberta that it has become a distinct menace to several districts throughout the province, according to W. H. Fletcher, of Brant, Alberta, who has petitioned the department of agriculture to encourage their eradication.

Mr. Fletcher attributes the increase of the jack rabbit to the wholesale slaying of coyotes, which animal largely maintained itself at the expense of the rabbit. Mr. Fletcher suggests in his letter that the bounty for coyotes be discontinued, and it be made a criminal offence to kill this beast. He believes that Alberta ultimately will be faced with a serious condition, similar to that which confronted Australia unless something is done to kill the jack rabbit and measures taken to preserve its natural enemies.

FRECKLES

Now is the Time to Get Rid of These Ugly Spots

There's no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these homely spots. Simply get an ounce of Othine—double strength—from any drug or department store and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than an ounce is needed to completely clear the skin and gain a beautiful complexion.

Be sure to ask for the double strength Othine as this is sold under guarantee of money back if it fails to remove your freckles.

We recommend Othine Complexion Soap for use with Othine, also as a shampoo—it's wonderful for bobbed hair—25c. a cake at all drug or department stores or by mail, Othine Laboratories, Inc., Buffalo, N.Y.

Methodists Have Big Campaign Fund

Money to be Used for Assisting Denominational Enterprises.

Toronto, March 31.—The Methodist National Campaign Fund, inaugurated in 1920 for the purpose of providing for denominational enterprises, reports that \$4,178,543.54 has been collected to date. Conferences have collected as follows: Toronto, \$1,206,871.55; London, \$525,812.23; Hamilton, \$586,287.24; Bay of Quinte, \$362,742.43; Montreal, \$545,125.52; Nova Scotia, \$165,436.94; New Brunswick and Prince Edward Island, \$161,205.29; Newfoundland, \$29,689.53; Manitoba, \$220,402.29; Saskatchewan, \$179,629.78; Alberta, \$72,606.54; British Columbia, \$122,633.70.

The missionary society is benefiting in enlarged permanent trust funds, from the income of which mission buildings are erected. The endowment of the superannuation fund has been increased by \$1,491,500. Western Canada colleges have had some large debts paid. By the end of May the fund is expected to total \$4,300,000.

The Law of the Neighbour

"Ever since man began to be neighbour there has been trouble about it. One of the most ancient curses on record is pronounced against the iniquity of removing a neighbour's landmark," says the Daily Telegraph. "The law of neighbours is dangerous stuff. Take the example of the hedge which divides your land from your neighbour's. There are hedges which by law belong to one party, hedges which belong to both, and hedges which, as far as the law can tell, belong to neither and nobody. If your neighbour's apple trees drop fruit on your land you must not eat it. It is still his, and should you decline to give it him, or to let him come and take it, he may come without your permission, but not by force nor causing any damage to your property. If his trees put branches or roots on your side of the fence you may cut them away without a word to him. But should the branches bear any fruit or flowers, you must return these things or pay the value thereof."
