# ONGEST GAME OF THE SEASON; EIGHTEEN INNINGS AT ST. LOUIS

The longest game of the present and Drill. Umpire, Connolly. Attendance, baseball season was played on Saturday at St. Louis between the St. Louis and Chicago National League clubs.
The match went eighteen innings, and it was won by Chicago by a score of 2 to 1. St. Louis tied by scoring a run in the ninth, and during the next eight innings neither team could get a man in the ninth, and during the next eight innings neither team could get a man across the plate. A triple and a long fly secured the winning run for Chicago. The fielding of the winners was remarkable, 85 chances being accepted without an error. It was a pitchers' tettle are Tevelor and Poelback dairy.

Shortly afterwards the invitation was be justified in inferring that he did not extended once more. This time the young actor accepted and was in high glee over the prospect of a pleasant tete-a-tete with Barrie, and reveling in advance over the good things she

At the appointed time the pair left the theater and went to a near-by restaurant, where a quiet corner was secured. With some obvious diffidence, Barrie ordered lunch. Then there was The fair guest, rather surprise, hazarded some remarks which were answered in monosyllables. Silence again, broken after a little by another desperate attempt on the part of the girl to make conversation. But her companion answered hardly a word and so the luncheon went on in mute solemnity. At the end of it, Barrie inquired gravely, "Shall we return to the theater?" And they did.

"I haven't a diamond tree," said the jeweler. "Smith, over the way there, has

# MILK THAT IS BEING SUPPLIED LONDONERS BY THE DAIRYMEN

Semi-Annual Report of Dr. Hutchinson—Average Is Not High.

The following is the semi-annual report of Medical Health Officer Hutchinson on the milk supply of London. It will be of interest to every house

I herewith present a report of the inspection of herds, dairies and quality of milk supplied the city during the winter and spring months. The average per cent of richness or butter fat, in about one hundred samples was a fraction over 3.75 per cent. This is not a high average, and is no doubt The herds and dairies are given as heretofore, in the order of merit: A, B and C, and the milk in thee classes, 1, 2 and 3, according to quality: that is, the percentage of butter fat in a given quantity. One sample had cream added, this being done for publication,
