Smoke Consumers. Editor World: There is a movement to place smoke-consumers on the water-works boilers. I think it time that the city compelled all manufacturers and works boilers. I think it time that the city compelled all manufacturers and others using boilers to put them in, as it will not only be a general benefit to the city, but to the users themselves, owing to the saving effected. With them a cheaper coal will do the same work. Quite a number are in use in this city. I am also of the opinion that the railway companies should be compelled to use them on their engines, for the comfort of their passengers, as well as doing away with the nuisance that they are to residents and business places near their tracks, and to prevent the destruction of property by fire. Ninety-five per cent. of the smoke can be consumed.

W. J. Donley's New Stable.

Thomas Bayley is suing in the County Court to recover damages from A. R. Clark & Co., the Eastern-avenue leather merchants. Bayley formerly resided in Eastern-avenue, and while playing on a vacant lot in the rear of the Clark tannery, in June last, his 7-year-old boy stepped on a pile of hot ashes which had been placed there by a factory hand. The ashes ignited the child's clothing, severely burning him about the legs.

Elegance

is a feature in the appearance of every Mason & Risch piano. You can almost recognize one of our pianos by its chaste appearance and absence of showy ornament.

Art Quality

is manifest the moment you either play it or hear others play it. Crispness of tone, delicacy of touch and sympathetic tone distinguish it.

Durability

is a leading characteristic. You cannot tell whether a piano will last when you are buying except you are guided by the reputation of the makers. You will not go astray in purchasing from an old-established house such as ours.
