UnIted States Interest in China.

[New York Times.] Nothing could have happened to point or more sharply the neglect of American inter ests in China by the State Department than the dispute over the Niu Chwang railway. It was the Chinese government that applied to a British bank for the money with which extend the Niu Chwang, an existing Chinese railway. The effect of the loan | ly. This is a good time to see that the well would have been to give Great Britain the control of the railway. The Russian minis- be no delayin going into a dug well. ter at Pekin has taken upon himself to forbid the railway to accept money from this

The veto is not only in itself an act of interference which it seems impossible that the British government should overlook, but it also indicates even more fully than has heretofore been disclosed the intention of Russia to control the trade of the whole coast of Manchuria. It happens that the American interests as directly as they threaten British interests. For Niu-Chwang is hat one of all the treaty ports in which American interests are of the greatest relative importance. The chief of the imports of the place are American, and among these American sheeting is the most important. There is no port of China in which the

prospect of enlarging the market of our manufactures is better, provided we can maintain the open door. If Russia succeeds in shutting the door, we may be quite sure our trade, instead of increasing, will diminalready backed the British contention against the exclusive Russian claims. But here is a case in which our direct commer interest gives us a clear right to be heard. It is not necessary to say that we should be heard now, on any question relating to the trade of the Pacific, with far more respec the first day of May. There could not be a more unexceptionable use of our new naval prestige than to employ it in keeping open to our trade the Chinese port in which our trade is comparatively the greatest.

Schley's Four Leaf Clover.

Back some time in May a certain young woman, West by name, and living in Kirkwood. Mo., found two four-leaf clovers in a that such good luck as they might bestow could be well utilized by Admiral Sampson and Commodore Schley, whose blockade of Santiago had just begun. So Miss West using ribbons of red, white and blue to effect the fastening, and after writing on the cards brief expressions of her good wishes she sent them to the two officers mentioned. Whethhim is uncertain. That it did not may be over some shrubs he wished to protect from deduced, first, from the fact that he took her sun and from some lineacts, and was dethat unfortunate trip to the eastward on the lighted to find that the latter cleared out as day when Admiral Cervera came out of the harbor, and, second, from the fact that Miss strip of ribbon enclosed with your card. I of the same kind would keep flies off his thank you most sincerely, and I hope when horses. for pride in that part of the navy under my command. We will do our duty fully, knowing that we have the encouragement and prayers of our fair women, and, come memory. May God bless you and us, my dear friend, forever." The date is June 9, and three weeks later, as everybody knows, the good luck came. Whether the clover skeptics on that point will admit that for tune has a habit of favoring men who are

44 After a spin along a more or less dusty road, the cyclist sometimes experiences a dry and subsequently sore and inflamed throat," says the London Lancet. "Head ache and depression often follow, and the some kind. When the bacteriology of road dust is considered, these effects are hardly to be wondered at. Hundreds of millions of locality, are found in a gramme weight of dust, and the species isolated have included well-known pathogenic organisms. Indeed, fecting power of dust when it is known that among the microbes encountered in it are the microbes of pus, malignant cedema, tetanus, tubercle, and septicaemia. The miswould probably be largely averted if, as nature intended, the respirations were rigidly confined to the nasal pasages and the mouth kept comfortably though firmly shut. As the air seldom pass beyond the extreme end of the nasal passage, and consequently never to the pharynx or bronchial surfaces. A aseful precaution, therefore, in addition to exclusively breathing through the nostrils, an attractive manner will find customers in would be to douche the nasal cavity, after a warm solution of some harmless antiseptic."

Expressed by Mr. Gladstone in a parlia-"It is the duty of government to make it

easy for the people to do right and difficult for the people to do wrong."

To a deputation of distillers and brewers when he was Chancellor of the Exchequer: "Gentlemen, you need not give your enue. The question of revenue must never s:and in the way of needed reforms. Be sides, with a sober population not wasting their earnings, I should know where to ob-

Honesty in Norway and Sweden. Had Abraham Lincoln lived in Norway or Sweden, probably he would never have been known to the world as "Honest Abe," because there honesty is so common as to attract no attentiop. Travellers tell us that at the railway restaurants passengers help themselves to whatever they wish, and then report what they have eaten and pay for the same without any questions being asked. A per son's word is always taken, and he is never who has recently been in the Northwest on a who has recently been in the Northwest on a who has recently been in the Northwest on a who has recently been in the Northwest on a whole who has recently been in the each item, adds up the amount, receives the money, and puts it in her pocket. When filled, she gives the money, without counting, to the stewardess. Instead of making them careless, they are more scrupulously honest than any other nation in the world.

Agricultural.

Farm Cleaning. The sccret of being able to keep down weeds about the premises is to either have every foot of ground occupied by animals or crops or have it in such condition that the mower may be run over it at any time. impure water. A dead mouse or bug will cause the water to taste and smell offensive-

the last few years, except during the Leiter a minimum cost. First, we need a good seed-bed; second, we need good seed, and at all the polling sub-divisions, of which third, we must have plant food in the soil to | there are something like three thousand five produce a crop.

From many orchards which might have yielded a good crop of winter apples only a medium to short crop of inferior fruit is now xpected. Such shortage, compared with a full crop as is now manifest, is due in part to reasons which could not be remedied by spraying, yet in a vast number of orchards the proper and persistent observance of this necbrought returns more than commensurat with the outlay of energy required. Raising Calves Without Milk.

Some years ago, says a correspondent of Hoard's Dairyman, I raised quite a number for each calf into an iron pot of sufficient cooked it for not less than an hour. The result was a strong decoction of hay. The three pounds of hay furnished tea enough for one feed, seven pounds. This contained the part of the hay easiest digested and was lists to be used at the voting. quite nourishing. Each calf was fed twice a day, seven pounds at a meal, at the temperature of 90 to 92 degrees by the thermome er. For the first two weeks the calves had whole milk, then for a week milk and tea mixed, and then all tea. I taught them to calves I raise. I nearly always succeeded in teaching a calf to eat middlings and a little good hay at three weeks. My calves did well on the hav tea, but it is lots of trouble, as the tea should be fresh made for every

A Good General Fertilizer. "For a good, general, well proved fertilizer for all kinds of fruits give us the old fashioned mixture of flour of hone and unleached wood ashes," says a New England Home stead correspondent. "This makes a perfect fertilizer, furnishing nitrogen, potash and phosphoric acid. It produces fruit rath er than excessive growth of wood and foliage, and what is more gives fruits of highes quality and most palatable. I get good color and good flavor from this fertilizer as ready to observe the little amenities of The proportions may be varied to suitdiffer life as they are to perform its stern duties. ent needs. I would recommend two tons of wood ashes and one half ton of bonemeal east and thoroughly harrowed or cultivated

> ing trees to apply around the trunks. Cove the entire surface so as to find feeding roots.

Cheap Hoghouses Best. The elaborate designs for hoghouses which used to be quite generally published in farm bacteria, according to the nature of the papers are out of date now. It is not best to keep a large herd of hogs together at any sow have a house by herself where she can rear her young, not only out of sight, but out of hearing of other hogs. These small hog-houses should be made cheap enough and firm enough so that, if desired, they can be removed and set in another place. In this way a few movable hog-houses, each with a sow and litter of pigs, may be made to fertilize the whole orchard instead of vicinity of the hogpen, if the policy of mak, ing a large building and keeping many hogs in it is adopted.

Dainty Dairying.

Dairymen able to prepare their goods in even small villages, where others cannot duety run or walk, with a weak and slightly make sales. The appearance pleases, and when the quality is found as good as the cake of good butter, wrapped in fresh parch ment paper, with a bright trademark and the owner's name upon it, will bring more for the half-pound or the pound than a chunk ribbon tied around the wrapper will help to sell every cake so wrapped before one of the same lot not so wrapped can be disposed of. To please the eye it is necessary to reach the

How to Use Emulsions.
