**IMPORTANT TO FARMERS.**  
**READ** the following Letter from Mr.  
 Geo. H. Pierce:

RICHMOND, C.E., March 17, 1866.  
 DEAR SIR,—Last year I used two and a half tons of  
 SUPER-PHOSPHATE upon fields of CORN, OATS and  
 TURNIPS, and am happy to give you the results, which  
 were as follows:—About 1½ acres of Corn were sown  
 in drills 3 feet apart, for fodder, applying about 1½ lbs.  
 of Phosphate to the acre, sprinkled in the drills and  
 covered in with the seed. The variety was the "Yellow  
 Dent Corn." The growth was remarkable, averaging  
 ten feet high, and the product reached the extraordinary  
 amount of 36 tons per acre of green crop, or  
 18 tons per acre of dried fodder, (the shrinkage being  
 50 per cent, according to the best authorities). I com-  
 menced feeding ten cows upon this fodder, on the 15th  
 of November last, giving them two feeds a day of the  
 fodder, and one feed a day of either hay or mowed  
 oats. In this way the product of 1½ acres has kept the  
 ten cows until the 15th instant,—a period of four  
 months. It will be seen that this a very economical  
 feed, and I would recommend its general adoption by  
 farmers who have stocks of cattle to winter.  
 On the Oats I applied the Phosphate upon two 6-acre  
 fields, leaving occasional strips of land without its ap-  
 plication. The results were, that upon one field where  
 the soil was rather poor, the yield was doubled; and  
 upon the other where the soil was rather better, the  
 increase was fully 50 per cent.  
 Of Turnips, I had about five acres of poorish land,  
 the whole being manured in the drill with common  
 farm-yard manure. I applied Phosphate in the drill  
 at time of sowing, to 4 acres, and obtained a yield of  
 nearly 600 bush per acre, while the acre left without  
 Phosphate produced not over 300 bush.  
 Having used the article now for two years in a man-  
 ner to test it well, I am convinced that it is not only  
 efficient in producing large crops, but that it is also an  
 economical fertilizer for ordinary farm crops.  
 I am yours truly,  
 GEO. H. PIERCE.

Mr. E. L. SNOW, Montreal.  
 One ton of the CANADIAN SUPER-PHOSPHATE  
 is equal to Two Hundred Loads of good Farm-yard  
 Manure.  
 It is easily applied, and is the most CERTAIN and  
 ECONOMICAL means of producing LARGE CROPS.  
 Farmers can obtain a supply at the stores where they  
 are accustomed to trade.  
 Address, E. L. SNOW,  
 Manufacturer,  
 Montreal.
