

Another Undergraduate match, and this time a victory for the home team. Singularly enough the principal scores on each side were the same as in the former match—Boulton 13 and 19, Lindsay 14 and 10, D. M. Howard 5 and 14, Coldwell 5 and 12. The wicket "bumped" a good deal, and scores were consequently small. Armour had 7 wickets at a cost of 37 runs, Lindsay, in the first innings 7 for 10. On the losing side Allen had 7 for 29.

University College, June 25.	1st Inns.	2d Inns.	Total.
Trinity College (10 men)	113		113
Toronto	45	48	93

Trinity won in an innings by 20 runs.

The first time a really respectable team was placed in the field; and though one man failed to turn up, and Spragge, Campbell, D. Howard, and Coldwell could only muster a brace of runs among them, a very creditable victory ended the season. G. W. Allan "came" off with a really good innings of 33, including a fine hit for six, Irving (whose 14 also embraced a six) assisted him in making things lively at the commencement. Other scores worthy of mention were A. F. Campbell's 23, J. S. Howard's 17 (n. o.), and Townley's 18. Toronto tried seven bowlers, of whom Behan obtained 7 wickets for 44 runs, Totten and Sproule being credited with one each.

For the club, who had to follow their innings, Sproule obtained 12 and 10, Totten 7 and 8, Behan 1 and 13 (n. o.), and Helmcken in the first innings smote everything with perfect impartiality to the extent of 16. D. M. Howard bowled well in both innings, getting 12 wickets for 43 runs, Irving had 4 for 12, Spragge 3 for 11. The Trinity fielding was good.

Prospects for the coming season are very good. Two additions have been made to the undergraduate strength, while on the other hand the loss by departure will be small. It is probable also that more graduates than usual will be available. Among others, Dr. A. M. Laines has returned from England, and we hope to have the benefit of his valuable assistance in a few matches. Material also has been ordered direct from England—a step in the right direction.

#### COMMUNICATION.

To the Editors of 'Rouge et Noir'.

GENTLEMEN,—Unity has ever been regarded as a sign of strength—but unity, based on sentiment, is from the very outset, injurious in its results, because it does not carry action along with it.

The University of this College ought to be congratulated because there exists to an illimitable degree this sentimental bond of union, which, as we know, has left us—well! where we were thirty years ago.—The result of this inertia was due to the authorities of the College in not allowing the graduates a participation in University matters. Now this being removed, there is no reason why our condition could not be bettered. But before any improvement can take

place, the axiom must be laid down that the success of every University depends on her graduates. Having then defined the general principles by which prosperity can be obtained, let us examine the vista which opens before us.

At the present time, it must be conceded that a vast number of the graduates of the College, from their position can wield an immense power, to the advantages of this University, by placing before the people the advantages accruing from an education blending with the general principles of Christian truth, to inculcate such principle was the object of the founders of this University; and in losing sight of it, we alienate from ourselves a factor which is of vital importance to the success of this University.—I shall suggest, with the kind permission of the editors other ways by which the interests of our Alma Mater can be advanced in the next issue. Yours, etc.

AN INTENDING B.D.
