

**The Blue Book, Textile Directory,
Exposition Edition, with
Patent Index.**

The 14th annual edition has been issued, and shows some 350 new mills during the year.

The map plates of the Southern and Middle States have been newly engraved, these showing all towns where textile plants are located.

In view of the Pan-American, and South Carolina, Interstate and West Indian Expositions opening this year, the publishers have given views of the principal buildings of both expositions, with explanatory matter.

More details concerning the mills are given than heretofore, this increasing the size about 60 pages, the price remaining the same.

The Blue Book contains all Textile Manufacturers in the United States and Canada, including in the office edition, a directory of Textile Mill Supplies, covering the Machinery, Chemical and Dye-Stuff Manufacturers, with the Commission Merchants, Yarn dealers, etc., and these, in connection with its many pages of specially engraved maps, make it a trade work of the highest order.

Price:—Office Edition, \$3.00; Traveler's Edition, \$2.50.

**DAVISON PUBLISHING COMPANY,
401 Broadway, New York.**

The by-law to grant aid to the newly organized Canadian Cordage Co. at Peterboro, referred to recently, has been carried, and work will be proceeded with. The company undertakes to spend \$60,000 in machinery and buildings, and is to employ 75 hands. The new cordage factory at Walkerton is now running, but the scheme to establish similar works at Chatham, Ont., fell through. The Ontario Farmer's Cordage Co.'s works, which opened last April, has been running night and day till now. It is a mill of 60 spindles.

**IMPROVED DOUBLE-BED
ROTARY**

CLOTH PRESS

The bed plates are self-adjusting, the levers that operate them being mounted upon sliding steel fulcrum bars within the frames. The trussing apparatus of the bed plates is so arranged as to permit not only a forcing of the centres of the bed plates in a forward direction, toward the cylinder, but also away from it, which is of the utmost importance if the bed plates should ever become sprung. Bed plates and cylinder, after being cold finished, are ground absolutely true while heated by steam at 75 lbs. pressure, insuring perfectly straight and uniform pressing surfaces. Pressure is applied and removed instantaneously, and by power.
