ing.) This incontrover tibly proves what cash be done by persevering efforts. Previous to the formation of the Canada Company, persons wishing to emigrate to this province, spoke of going to America; subsequently they speak of coming to the Huron Tract. (Great cheering.) Before I conclude, I cannot refain from congratulating you all upon the happy absence of crine in this district. Our highly valued guest, Mr. Justice McLean, has hed the pleasing task of complimenting the inhabitants a second time on the absence of any criminal case for trial. This evinces the very highest moral testimony in favour of the creditable character of the district. The interest I have ever felt in the success of this district continues unabated; I wish it prosperity; no efforts of mine shall be wanting to promote its welfare; and believe me, Mr. Chairman and gentlemen, for the compliment paid my exertions, which the Chairman and your kindness have so ever-tracel, I feel most grateful. I thank you heartily. Mr. Jones sat down amidst great cheering.

rates, taxes and tythes, are added, the expense per acre is from judges the most beautiful model on the western waters, and no doubt is entertained but she will prove a "crack boat." MELANCHOLY ACCIDENT .- It is our painful duty to aunounce the death of Capt. Macauley, of the schooner Morning Star, of this Port, which took place under the following circumstances:—On Tuesday night last after tea, Capt. Macauley sat down on the Bulwarks of the schooner, near the stern, and entered. entered into conversation with the man at the helm. (The schooner was then scudding before a smart breeze opposite the Upper Gap.) In a few minutes he fell over board and was drowned. He has left a wife and family to lament his untimely

IMPROVEMENT, MORAL AND SOCIAL. - Every evidence of frame laws, to those by whom they are administered, and to visions will be £500,000, and the repairs, replacement of capit those states and the great body of the the great of the Home District, is one which will be remarked with plea-

plies himself, with much practical knowledge of the subject, to prove that a system of wooden tramways, equally expeditious, and more safe, more durable, and considerably more economical the subject in the supplies necessary for such colonies and the produce exportant more safe, more durable, and considerably more economical and more safe, more durable, and considerably more economical than the iron railway, might at once be introduced into Ireland, to the the mutual benefit of the English, Scotch, and Irish capitalist, merchant, and labourer. In conveying to our readers a ion of this plan we shall avail ourselves of portions of Mr. idges' letter, and thus describe its details:—

indurated and protected against the ordinary destructive occess of fire, rot, and insects, by a very philosophical process, solutions, mineral and alkaline, which, by decomposition, mute the timber into a new and incorruptible substance. These trams are laid down on the principle of the 'double way' surface of traine of traine of traine of traine of traine of the ground. The tires of the wheels are perfectly flat, and behind each carriage two guide wheels are fixed, at an angle of 45 degrees, revolving upon independent axies; a deep groove in their circumference embraces the upper and inner-edge of the trams, and the friction being thus thrown upon the oblique axies the traine of the ground. The cultivation of madder has heretofore been represented as in the "Electa ex Ovidio et Tibullo," Eton, 1840, between the considered as are taken to madder has heretofore been represented as the considered without any perceptible abrasion of the rails. The friction and on, and general wear and tear involved in the use of the onical tire and the flange, are thus obviated; and the friction fattrition is converted into a friction of rotation. All the wheels, moreover, are on separate axles, so that in a curve the inner and outer wheels adopt themselves necessarily to each sinuosity: on the present system of common axle, the outer wheel revolves while the inner one is dragged along upon a curve. Upon a level, experiment has proved that one-fourth less nows: less power is required to move an equal weight upon a railway of this construction than upon the flanged-wheel carriages of an iron to the state of tron rail; at the same time, the bite of the wood affords a greater power of ascending gradients, and the bevel wheels give the facility of traversing the sharpest curves. A machine of seven tons can thus the same time, the bite of the wood affords a greater those of any other farm-crop that can be named.

These qsscrtions are fully corroborated by the experience of an enterprising American farmer, Mr. Joseph Swift, of Erie county. Ohio, who has been engaged in the culture of madder an hour. On the one hand, the durability is attested by the fact that wood properly prepared has recovered the deflexion occasioned. occasioned by the pressure of 140 tons upon a segment of an iron wheel three inches in the tire, and that an experimental from this account it will be a segment of the first traffic. traffic equivalent to seven years of an ordinary line did not ob-

In spite of the abundant stone of that country, are well exhibited by Mr. Vignoles, in the appendix to the Irish Railway Report. The rigidity and the vis intertiæ of stone supports indeed, may be held to be one among the many causes in operation which induce such fearfully rapid wear and tear upon some of

periment to test the adaptation of the guide-wheels iron railways has just been made upon the Hayle line, and as completely succeeded. The groove of the guide-wheels was reduced so as to pass over the chairs in which the iron rails are the A loaded truck, fitted with guide-wheels, and divested anges on the bearing wheels, was propelled with a spower than one equally laden, but with the comwheels; proving that an engine can take a train of fitted with the Prosser wheels one fourth heavier than with the flange wheels now in use. Moreover, the oscil-lation, with on, when going at full speed, was found to be almost insen-They will produce a corresponding saving in the wear and tear of carriages and engines, as well as add greatly to the tion of the rails; and the adoption of the guide-wheels to thas been fully tested by practice on the lines that have determined to make use of it.

The following, we presume, is the process alluded to in the above notice of Wooden railways,—a process, the invention of which is of incalculable interest to the people of Canada:

CONVERSION OF WOOD INTO IRON.—The conversion of interest in England. If the experiment bears the test of thorough trial, it will add immensely to the facility of constructing alloweds. garded by intelligent men in England:

ocen taken out for converting it into iron, I should rather say of their articles before that time stone, by means of iron. Thus metalized, or rather fos-Tump. A solution of sulphate of iron is then injected, which immediately enters into the exhausted pores of the wood.

The wood is then withdrawn, and again placed in a similar in a solution of muriate of lime, which, coming into

dustry and perseverance. Gentlemen, when I first paid a visit | contact with the sulphate of iron within the wood, decomposes | Such a crisis in argiculture need not be anticipated in this dustry and perseverance. Gentlemen, when I first paid a visit to this fine portion of the Province, I was accompanied by a gentleman present; there were then three small shanties, inhabited by as many families, and not one single acre of land leaved. I am now speaking of 14 years ago. What a different and gratifying picture does this noble district now present; our population exceeds this teen thousand, the number of acres cleared nearly forty thousand, and the amount of property assessed over three hundred thousand pounds. (Great cheering). This incontrovertibly proves what can be done by persevering efforts. Previous to the formation of the Province, I was accompanied by a gentleman present; there were then three small shanties, inhabited by as many families, and not one single acre of land end in the muritate of iron, the other new compound, goes about its business. So the wood becomes thoroughly into the wood; and the muritate of iron, the other new compound, goes about its business. So the wood becomes thoroughly into the wood, decomposes it, and forms an insoluble sulphate of lime, or gypsum, within the wood, decomposes it, and forms an insoluble sulphate of lime, or gypsum, within the wood is and the muritate of iron, the other new compound, goes about its business. So the wood becomes thoroughly into the wood; and the muritate of iron, the other new compound, goes about its business. So the wood becomes thoroughly into the wood is and the muritate of iron, the other new compound, goes about its business. So the wood becomes thoroughly into the wood, decomposes in argiculture need not be anticipated in this country, if only caltivators of the soil would adopt the improved methods of cultivations which are for acres they may be a prepared with stone, as hard as a rock, and is yet as tough as prepared with stone, as hard as a rock, and is yet as tough as prepared with stone, as hard as a rock, and is yet as tough as a rock and in this country, if only caltivators of the soil would adopt the improved method

thank you heartily. Mr. Jones sat down amidst great cheering.

New Steamer.—The new Steamer built at Chippawa by the Niagara Dock Company, was launched last week in good style, and was christened "The London," Miss Fanny Smyth.

The company of the Market, these meadows are rented at the enormous prices of from £5 to £10 Sterling per statute acre—and when the poorseting a space. The company of the company of the summer. The company of the summer of things and which are in some cases mown twice in the Market, these meadows are rented at the enormous prices of from £5 to £10 Sterling per statute acre—and when the poorseting a space.

our Farmers would turn their attention to this subject, and we a much less price per bushel would be equally as remunerative No doubt is entertained that the commerce on the British side of Lake Erie is now large enough to furnish employment for a line of steamers, and there is no fear that the London,—so called in compliment to the town of that name, where several of the stockholders reside—will be profitable. We hope there is public spirit enough in the Province, to complete the line so favourably commenced by the construction of the London, and in no long time we may be able to write something creditable about "our steam payy" on the upper lakes.—Niable about "our steam navy" on the upper lakes .- Nia- our enterprising Forwarders to assist, by their store houses. which are little occupied in the winter, and to give a little of their attention to the process of pressing. The cargo should appointed Cashier of the Branch of the Commercial Bank at this city, in place of Mr. Thomas Wilson, —Montreal Pilot.

MELANCHOLY ACCOUNTS. It is our painful daty to any Canada. - Kingston Chronicle.

BRITISH TROPICAL COLONIES. - A return (No. 426) to the order of the House of Commons has lately been printed, giving the exports and imports of the trade between this country and different parts of the world for 1843. From the different returns quoted, the following important facts are illicited :-- in the trade between Great Britain and the Colonies in the western world, about 60,000 seamen are yearly employed. The wages and provisions for these cannot be less than £3,600,000 per annum; and the repairs, insurances, and the replacing of capital in the ships, £4,500,000 more. In the trade between IMPROVEMENT, MORAL AND SOCIAL.—Every evidence of amprovement in the condition of society must be gratifying dike to rulers and the great body of the ruled—to those who frame laws to the great body of the ruled—to those who is also to the great body of the ruled—to those the great body of the ruled—to those who is also to the great body of the ruled—to those who is also the great body of the ruled—to those who is also to the great body of the ruled—to th those who desire and enjoy their protection. The observations made by Mr. Justice Jones, in a late charge to the grand jury of the Home Distriction and enjoy will be remarked with please. of the Home District, is one which will be remarked with pleasure by our readers. His Lordship, in congratulating the jury upon the lightness of the criminal calendar, took occasion to observe, that the decrease of crime was not confined to the Home District, before the confined to the confined to the confined to the confined to the Home District, before the confined to the confi the one branch of trade over the other,—in noise, a case where the other,—in noise, a case where the other,—in noise, a case where the one branch of trade over the other,—in noise, a case where the one branch of trade over the other,—in noise, a case where we cordially join in the hope expressed, that this may not be a temporary occurrence, but a permanent improvement. There was likewise observable, a very great decrease in the number of civit suits brought before the courts in the Home and other circuits.—Kingdon Noise and the Home and A Week from land to land across the Atlantic in one week.

Wooden Railways.—The late elaborate Report of the late and across the Atlantic in one week.

"The great superiority of longitudinal sleepers over stone of the Great Western Railway: and the Rationale of such a in spite of the great superiority to the circumstances of Iraland. From this account it will be seen, that after having informed mode, and its peculiar adoption to the circumstances of Ireland, in spite of the abundant stone of that country, are well exhibited have a spite of the abundant stone of that country, are well exhibited have a spite of the abundant stone of that country, are well exhibited have a spite of the abundant stone of that country, are well exhibited have a spite of the abundant stone of that country, are well exhibited have a spite of the abundant stone of that country are well exhibited have a spite of the abundant stone of the country are well exhibited have a spite of the abundant stone of the country are well exhibited have a spite of the abundant stone of the country are well exhibited have a spite of the abundant stone of the country are well exhibited have a spite of the abundant stone of the country are well exhibited have a spite of the abundant stone of the country are well exhibited have a spite of the abundant stone of the country are well exhibited have a spite of the abundant stone of the country are well exhibited have a spite of the abundant stone of the country are well exhibited have a spite of the abundant stone of the country are well exhibited have a spite of the abundant stone of the country are well exhibited have a spite of the country are well exhibited have a spite of the country are well exhibited have a spite of the country are well exhibited have a spite of the country are well exhibited have a spite of the country are well exhibited have a spite of the country are well exhibited have a spite of the country are well exhibited have a spite of the country are well exhibited have a spite of the country are well exhibited have a spite of the country are well as th

quality was superior to the average of imported madder.

The labour required, including the whole time, with the digging, clearing, threshing, &c. was from eighty to one hundred days' work per acre. The outlay for buildings, fixtures, &c. did not exceed, in all, fifty dollars.

The value of the crop was at the rate of fifteen cents per pound, at which price he sold most of it—notwithstanding the cumstance of its being unknown to purchasers, and all the prejudice that usually exists in such cases -M. B. Batcham, one of the Editors of the New Genesee Farmer.

THE FARMERS' PROSPECTS .- We have delayed making my remarks in relation to the present year's harvest up to this late period, because the accounts that reached us at the early part of the season, as well as up to the completion of the harvest, differed so materially, that it has been extremely difficult to come to a correct conclusion upon the subject. From the most authentic information received, we should judge that the wheat crop in the United States and Great Britain will-equal wheat crop in the United States and Great Britain will-equal a full average, and therefore, the prices of bread-stuffs in those countries will range something lower this season than the past, unless there should happen to be some extraordinary demand for the article, which we have at present no right to anticipate. Every intelligent person must be aware, by this time, that the markets of the above-mentioned countries rule the markets of markets of the above-mentioned countries rule the markets of the above-mentioned countries are concerns.

place, through an abundant harvest abroad. As the products of this country are now admitted into the British markets upon the most liberal terms, it is only rational ads. We hope the engineers and those concerned in the discovery. The following extract of a letter from Profestright, dated I. hew discovery. The following extract of a letter from Professor Wright, dated London, June 18, 1844, and published in the Boston Chronicle of July 10, will show how the matter is restarded by intelligent men in England:—

A good deal is said lately about wood, and a patent has been taken out for convention it into iron. I should rather say of their articles before that time.

scone, by means of iron. Thus metalized, or rather fos-teed, wood has been used in constructing the terminus of the ver railway and ver railway, and it really seems to have both the properties stone and iron. Rails of it laid down at Vauxhall, for eximent, enders. ment, endured a travel equal to that of a year on the most ronged railway, without any perceptible wear, not even the abers thus prepared will not be liable to rot or decay of any on will be of its. If this prove true, the inventor of the considered untenable, masmuch as the whole of the export provision trade of the country would not afford sufficient for a single breakfast for the vast population of Britain. If the products of the country were quadrupled—which might be accomplished, if only the proper and legitimate which might be accomplished, if only the proper and legitimate And. This, time will test. If this prove true, the invention will be of immense importance where wood is yet plentimber is simple to scarcer, than here. The process of preparing data agriculture—the producer in this colony would certainly detailed agriculture.

compete, in the production of agricultural produce, with other countries. If wheat or other produce can be afforded in other countries, at a less price than it can be purchased for here, the canse of this cheap production should be a matter of investiga-tion, so that the intelligent cultivator might decide upon the adoption of other, cheaper, and more certain methods of man-agement than those formerly applied, so that he might safely defy competition, let it come from what quarter it may. It is common for farmers to say that they cannot afford to grow wheat under one dollar per bushel. Admitted that this be true under the old system of farming which has been handed down from father to son, for the last half dozen generations or more, with very slight modifications, still it does not follow but that under an improved system of cultivation. A really clever or scientific farmer seldom fails in obtaining a good round interest in that commodious house at the Corner of York and Adelaide has reason to complain of the times, the other is ever finding fault with the times, crops, weather, &c., and is certain to attribute all the mishaps which befall him in his affairs to other than their legitimate causes.

N. B.—All letters must be post-paid. Montreal, 1st June, 1844.

FOR SALE, A NEW and well built Stone Cottage, with five Acres of good land, benetifully situated in the romantic and thriving village of Aneaster, and distant but seven miles from The Cottage is nearly finished and is, with the Stable, Coach House, Poultry House, Shed &c., in excellent repair. Being in the immediate vicinity of Churches, Schools, and

the Post Office, it offers a desirable residence for a gentrel family. The road to Hamilton is Macadamized, and is one of Apply to Mr. H. E. Nicholls, Land Agent, Victoria Row, or

LEWIS MOFFATT. Toronto, June 22, 1844.

NOTICE TO THE PUBLIC. THE Sale of the Eleven (say Sixteen, as per hand bills.)
BUILDING LOTS, on the East bank of the River Don, near the City of Toronto, advertized in the fourth page of this journal, will be sold by AUCTION, on TUESDAY EVEN-ING, the 11th day of June next, at Eight o'clock precisely, at Mr. Wakefield's Auction Mart.

TERMS:-Only £2 10s. on each lot required down, the remainder can be paid in four equal annual instalments. NOTICE.

These Lots are larger, (being from one-fourth to three-fourths of an acre each.) cheaper, (see hand-bills,) and upon easier terms than any lots now offered for sale. The soil is well dapted for Pasture, Orchard, or Garden; and those lying of the Margin of the River, are well adapted for the creetion of any kind of Machinery propelled by Steam, and would answer well for a Brewery, Distillery, or Tannery. N.B.—Purchasers wishing to have a Deed at once, can have

one, by giving a Mortgage.

It may be well to remark, that such a Deed will entitle the holder to a VOTE in the First Riding of the County of York. Toronto, May, 1844.

For Sale or to Lease on Moderate Terms. A HOUSE AND OUT OFFICES, conveniently and comfortably arranged, in the vicinity of Cobourg, with or without about fifty-five acres of Land, one mile from the Church, Market, &c. A planked side-walk passes the door. This Property will be found an excellent investment, as the whole can be laid out in Building Lots, and must increase in

Apply to Mr. HARGRAFT, Post Office, Cobourg; if by August 1, 1844.

TO BE LET OR SOLD. Or the Captains of Vessels navigating Lake Untario.

THE HOUSE is in the Cottage style, nearly new, built in the most substantial manner of wood, with a good Stone Cellar underneath, and contains five Bed rooms, Drawing-room, Parlour, Kitchen, Pautry, and Closets, &c. &c. The Yard and Garden occupy half an acre, forming three good Building Lots, all enclosed with a close Thorn Hedge and Picketed Fence.—The Garden is well stocked with a variety of choice Fruit Trees, in full bearing. The situation is within the limits of the picturesque and rising town of Port Hope, near to the Lake Shore, and on the West side of the Harbour, possessing one of the most beautiful prospects to be found in Canada.

For further particulars apply to Mr. M. Jellett, on the

Port Hope, 12th August, 1844. FOR SALE,

THAT very valuable property, beautifully situated on the Shore of Lake Simcoe, Township of Georgina, being "THE BRIARS," the property of the late CAPTAIN BOUR-CHIER, R.N. The Estate contains 200 acres of very good land, of which there are 70 under good cultivation, and fenced in a very superior manner; the House is of Brick, well built, and not only comfortably arranged for a gentleman's family, with all necessary and fitting offices, but also well and completely finished in

"THE BRIARS" is within a mile of the Church, Post Office, exceller Grist Mill, Saw Mill, and Store, and a few minutes walk from the Steamboat Wharf at Jackson's Point, the cove of which is of which is one of the most perfectly sheltered boat-harbours of that beautiful piece of water, Lake Simcoe.

To any person visiting the picturesque scenery of the Lake, or desirous of settling on its healthy banks, this property can be pointed out by Capt. LAUGHTON, the intelligent commander of the Steamboat Beaver, who is acquainted with the place, and on whose information every reliance may be placed. For terms and particulars apply to EDWARD G. O'BRIEN,

370 Land Agent, &c., No. 4, Victoria Row, King Street, Toronto.

illness of some years' continuance, but borne with most exemplary Christian patience, Bartholomew Carley Esq., in his 87th year.

Col. B. Carley (4th Leeds Militia) was one of the very few remaining U. E. Loyalists. He was a native of Nobletown, or Hillsdale, County of Albany, State of New York. In August 1781 he arrived in Canada by the way of St. John's, after many hardships and hair-breadth escapes, as the trustworthy hearer of secret dispatches. In July 1784 he came for the first time to the Upper Province, and settled on his land in Brockville, then nearly a wilderness. He again served his King and country throughout the war of 1812 as Major, under commission from General Sir Isaac Brock. From the 18th of June 1823, he took precedence as Colonel. During 27 years Col. B. Carley held Commission of the Peace with credit to himself and benefit to the country. In 1833 a Parish vote in Vestry returned thanks for his services as Churchwarden during lifteen

successive years.

A consistent Christian, a loyal subject, a faithful friend, a kind parent, an affectionate husband, he will be long and most deservedly remembered. Col. Carley having been named in the Assize Commission for this District as one of the Associate Judges, his funeral, which took place during Assize time, was honoured by the attendance of the Court, purposely adjourned.

At Sherbrooke, on Friday the 11th inst., at the advanced age

of 77, the Hon. John Fletcher, Provincial Judge of the District of St. Francis and one of the Justices of the Court of Queen's Bench for that district, and also of the Provincial Court of Appeals. The intellectual endowments, and the great attain-ments of Mr. Fletcher, in almost every branch of science, as well as the high public stations he had occupied, rendered him one of the most marked characters in this country, and perand Sacchrometers, Phantas and Magic Lanterns, Compound and Botanical Microscopes, Prisms, Telescopes and Spy-Glasses, and various other articles in his avocation. In connexion, he has on hand and will make to order Watches, Jewellerr, and Silver Ware.

All articles in the above line made and repaired to order.

All articles in the above line made and repaired to order.

The was one of the most marked characters in this country, and perhaps on this continent. In varied and profound acquirements, as a jurist, a mathematician, a chemist, an astronomer, and as a general scholar, his learning and powers excited the wonder and admiration of all who had the pleasure of knowing him.—

He was one of two brothers who have distinguished themselves in the service of their country, though in different capacities; his brother, the late Sir Richard Fletcher, having been created a Baronet for his eminent services as Chief Engineer, under the Duke of Wellington in the peninsular war, and killed at St. Sebastian while reconnoitering the breach which he had effected, and through which the British troops subsequently carried the town by storm. Mr. Fletcher was the sequency carried the town by storm. Mr. Fletcher was the son of the Rector of Dedham, in Essex; he was born at Rochester, in Kent, and was one of the pupils of St. Paul's school, London. After completing his education he commenced the study of the law, and was in extensive practice in London. Before coming to this country, Mr. Fletcher had become distinguished as a man of science in London, where he was a contributor to many scientific publications, and was well known as a most able and successful lecturer. He arrived in this country in the year 1810, and was immediately admitted to the Bar here, and was for many years one of the leading members of the profession, where his great forensic powers are well remembered. During the contest between the two great rival Fur Companies in the North West territory, he was appointed one of the commissioners for the settlement of the difficulties between them, and Routes of Transport between Kingston and Montreal, via sioners for the settlement of the difficulties between them, and the Rideau Canal upwards, and River St Lawrence downwards. Their Line of Steam-boats, Ericsson Propellers, (first intropublic position which he held was that of Chairman of the duced into Canada by them) Schooners, and Burges, equal to any in the country, will enable them to forward Merchandize, Produce and Passengers, on the Canal, Lakes and River, at as aid.

THE Subscriber having received his expected Supplies of BOOKS and STATIONERY, from London, Edinburgh, and Glasgow, his Stock in all branches of the Business
