

A Modern Discovery of the Greatest Importance!

HOT WATER HEATING
BROUGHT TO PERFECTION

BY THE USE OF

--- The World-Renowned ---

STAR BOILER

The Star Boiler is the only safe one in every case, and gives the highest satisfaction when all others have failed. Unrivalled in finish, heating capacity and economy in fuel. The largest and finest buildings on the continent are being heated with the STAR BOILER.

NOTWITHSTANDING all the improvements which had been made in hot water heating there was still an objection, which was very difficult to overcome, and which gave rise to many vexatious disappointments and disgraces. This was, that the radiators on the lower floors, and especially in the basement, never heated as well as those on the upper floors. The water, when heated in the furnaces, was apt to rise to the upper stories in preference to the lower ones, and it was only when the circulation was well established in the upper coils that the coils on the lower floors commenced to heat, and, even then, the heat developed very slowly and necessitated a large consumption of fuel.

Having studied the most improved systems of heating, we have succeeded in building a furnace with a syphon-injector, by the aid of which the circulation in the coils on the lower stories is increased by the speed of the circulation in the coils of the upper stories. This important invention, which we have patented, works admirably and gives great satisfaction.

The well-known Architect, John James Brown, and the Star Boiler:

Messrs. E. A. MANN & Co.,
MONTREAL, 8th June, 1891.

Dear Sirs: The Star Boilers bought of you last fall are giving great satisfaction. I think a great deal of you and your company for the best.
Yours truly, JOHN JAMES BROWN, Architect.

The firm of Garth & Co. well pleased with the Star Boiler:
Messrs. E. A. MANN & Co., City, MONTREAL, 11th March, 1891.

Dear Sirs: We have much pleasure in stating that the several Star Boilers fitted up by your firm have given entire satisfaction in every case, and the addition of the syphon-injector is a great improvement for hot water heaters.

We remain, yours truly,
GARTH & Co.

Manufactured in Canada and the United States.
