

Typewrite the New Way

**80 to 100 Words a
Minute Guaranteed!**
Learn at Home---10 Easy Lessons

A wonderful new method of acquiring skill on the typewriter has been discovered. Almost over night it has revolutionized the whole typewriting situation. Already thousands of stenographers and other typewriter users who never exceeded 30 to 40 words a minute, are writing 80 to 100 words with half the effort and with infinitely greater accuracy than they ever could before, and they're earning salaries increased in proportion.

NOTHING ELSE LIKE IT

Don't confuse this new way in typewriting with any system of the past. There has never been anything like it before. It is as different from the old touch system as day is from night. Special **Gymnastic Finger-Training Exercises** bring results in days that ordinary methods will not produce in months. It is the greatest step in typewriting since the typewriter itself was invented—already its success has become nation-wide.

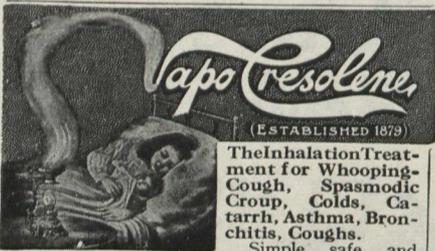

DOUBLES AND TREBLES SALARIES

Among the thousands of operators who have taken up this system are hundreds of graduates of business colleges and special typewriting courses—many were so-called touch writers—yet there has not been a single one who hasn't **doubled or trebled** his or her speed and accuracy, and the salaries have been increased from \$8 to \$15, a week (their former pay) to \$25, \$30 and even \$40 weekly. And the new way is **amazingly easy** for anyone—there are only 10 lessons and they can be quickly learned at home.

NEW CATALOG FREE

We cannot attempt here to fully describe this new method. But we have prepared a catalog which tells all about it in complete detail, which is **free** to those interested. It is a big 32-page catalog, brimful of eye-opening ideas and valuable information. It explains how this unique new method will quickly make your fingers **strong and dextrous**, bring them under **perfect control**, make them **extremely rapid** in their movements—how in a few short weeks you can transform your typewriting and make it **easy, accurate and amazingly speedy**—all this and much more is told in detail. No instruction book ever written, no matter what it cost, ever told so plainly the real **WHY** and **HOW** of expert typewriting.

If you are ambitious to get ahead—if you want to make your work easier—if you want to put more money in your pay-envelope—get our catalog at once. It will be a revelation to you as to the **speed** and salary that is possible to typists. Mail postal or letter **NOW**, before you forget. Address: **The Tulloss School, 5741 College Hill, Springfield, Ohio.**

Vapo Cresolene
(ESTABLISHED 1879)

The Inhalation Treatment for Whooping Cough, Spasmodic Cough, Colds, Catarrh, Asthma, Bronchitis, Coughs.

Simple, safe, and effective, avoiding internal drugs.

Vaporized Cresolene relieves the paroxysms of Whooping Cough and Spasmodic Cough at once; it nips the common cold before it has a chance of developing into something worse, and experience shows that a neglected cold is a dangerous cold.

Mrs. Ballington Booth says: "No family, where there are young children, should be without this lamp."

The air carrying the antiseptic vapor, inhaled with every breath, makes breathing easy and relieves the congestion, assuring restful nights. It is called a boon by Asthma sufferers.

For the bronchial complications of Scarlet Fever and Measles, and as an aid in the treatment of Diphtheria, Cresolene is valuable on account of its powerful germicidal qualities.

It is a protection to those exposed. Cresolene's best recommendation is its 38 years of successful use.

Sold by Druggists. Send for descriptive booklet. Try Cresolene Antiseptic Throat Tablets for the irritated throat, composed of slippery elm bark, licorice, sugar and Cresolene. They can't harm you. Of your druggist or from us, 10c. in stamps.

THE VAPO CRESOLENE CO., 62 Cortlandt St., N.Y. or Leeming-Miles Building, Montreal, Can.

5 Piece Table Set 15c.

A Lovely Table Set, Eyelet design consisting of one Centerpiece with 4 Dollies to match, on Fine Quality, Natural Bleached Art Linen, all for 15c. Extra Bargain to introduce our latest catalog of exclusive designs.

Girls in the World of Finance

The Business World's Extremity is
Woman's Opportunity

By ELIZABETH CLARE

FROM the first application by a girl, for admission to the banking profession, matrimony has been the nigger in the wood-pile, which has made banking officials dubious about admitting the feasibility of allowing women to occupy responsible positions.

But while in the past, this consideration has restricted advancement for women, and has dampened the enthusiasm of the powers that be, it cannot assume the same importance in the future.

The number of young widows and bachelor girls seeking some form of intelligent occupation, displaces the most telling argument against fair promotion in this profession.

The splendid response which the men of our Canadian banks, bond-houses and insurance business have made to the Empire's call has depleted the staffs of such organizations from fifty to seventy-five per cent. The attitude of these institutions, under very difficult conditions, has been wholly admirable. They have encouraged the enlistment of their men and have enrolled in their places inexperienced girls, and boys under military age. Many of the banks have not enough senior officers to place one at the head of each branch.

Moreover, the volume of business in the banks is increasing and the handling of each successive war-loan is a serious problem. It really needs the services of more experienced men than the banks are in a position to provide.

The real progress of women in banking life will depend, in the last analysis, on the attitude which they themselves assume. The girl who enters a bank because it has required of her no specialized training and is therefore to be regarded as an immediate source of pin money, will not climb far on either the promotion list or the pay-roll.

Neither will the maiden who is thrilled momentarily by the idea of "releasing a man for service overseas." Nothing is more essential these days than that women should recognize the necessity for doing just this thing—but they must realize that the responsibilities they are assuming are not to be measured by whims and passing enthusiasms. They call for steady, trustworthy service as long as the need for such relief-work exists.

But for the girl with ambition, with a good education, a training that has instilled in her the capacity for concentration and for assimilating ideas, a field is opening in the financial world that cannot be gauged at this juncture.

Reliability, steadiness, the ability to learn and retain the knowledge of a vast amount of detail, and a clear, logical head for the tenets of good business practice—these are the essentials that will enable her to fill competently the positions of accountant, or even to be manager of a deposit branch bank. It does look, to-

day, as though, contrary to the expectation of any banker in the country, a few years ago, there would very shortly be a real place, a worth-while place, for women in the banking world. Given the opening, it will depend, first, last and always, on each girl's own ability to conscientiously qualify herself for this new field.

Women have, to some extent, filled acceptably the vacancies left by the men who have enlisted, but according to the assistant general manager of one of our largest banks, they are still viewed in the light of an experiment. So far, the try-out has proven successful and has filled the need of the moment, which has not involved anything more radical than the placing of girls in the more or less minor posts such as those of collection clerks, savings ledgers and of a few tellers.

**The Possibilities
in View**

It is still a matter of debate as to whether women on the whole have realized the true significance of banking opportunities. It is generally conceded by most authorities that a qualified woman is eligible for almost any position in a bank.

Already, girls have risen to be teller-accountants—that is, girl tellers have assumed many of the duties hitherto assigned to the accountant and the rest—the supervisory parts, especially—have reverted to the managers. But the general manager of one of our largest banks, says that girls have attained to much more important posts, already, than the average accountant.

In fact, one bank which has a large number of city branches has been, considering the possibilities of a new policy which would confine that portion of their business relative to loans, to four or five of their branches judiciously allocated throughout the city and do only a deposit business in the remaining branches. If such a policy were pursued, there is absolutely no reason why a woman, technically efficient, should not be competent to manage one of the latter branches.

In order to attain such a degree of efficiency, the student in banking will find no speedier aid to the necessary office experience, than the banking course offered by Queen's University.

This college provides correspondence tuition in the Fellow's course and the Shaw Correspondence School takes charge of the Associate's Course, each maintaining a staff of recognized experts.

It is not generally anticipated by banking authorities that returned soldiers are going to be attracted by the apparently inactive life of the banker. But in any case, should time show such a prediction to be incorrect, the steady, logical development of the banking business augurs well for the permanency of its female staff.

INFANTILE PARALYSIS

left 8-year-old Evelyn Olson so crippled she had to crawl on her knees. Five months' treatment at the McLain Sanitarium restored her feet and limbs to the satisfactory condition shown in the lower picture. Her mother has this to say: "We feel it our duty to recommend your Sanitarium. Evelyn was stricken with Infantile Paralysis in August, 1915. March 1, 1916, we carried her to you. Five months later she could walk without crutches or braces. Words cannot express our thanks."

MR. and MRS. JOHN OLSON,
R. D. No. 7, Grinnell, Iowa.

For Crippled Children

The McLain Sanitarium is a thoroughly equipped private institution devoted exclusively to the treatment of Club Feet, Infantile Paralysis, Spinal Diseases and Curvature, Hip Disease, Wry Neck, etc., especially as found in children and young adults. Our book, "Deformities and Paralysis," also "Book of References," sent free on request. Write for it today.

The McLain Orthopedic Sanitarium
978 Aubert Avenue St. Louis, Mo.

AGAIN WE SAY THROW AWAY YOUR TRUSS

Rupture Completely Cured—Sound and Well

From the trenches of Europe comes a letter written by Private John Carter, whose home address is No. 2 Shaw View, Flixton, telling of his complete cure of rupture from wearing the Brooks Appliance.

April 18th, 1915.
C. E. Brooks,
Dear Sir:
I received your letter by first post this morning. I beg to thank you for your Appliance which was instrumental in the way it cured me of my rupture. I have now been in Kitchener's army seven months, and I have gone through all the training, and I have never felt anything and not had the slightest trouble. I remember when I passed the doctor he remarked "There is nothing wrong with you, young man, you are in the best condition," and he sounded me all over, and I again thank you for the same, and I give my consent to use my letter as a testimonial to anyone, as I have been cured. Hoping you and your firm much success.

Yours truly,
Private John Carter

And under almost the same date, the mother of a soldier writes:

2, Orchard Road,
Richmond, Surrey.
April 11th, 1915.
Mr. C. E. Brooks,

Dear Sir:
A line to thank you for what your Appliance has done for my son. After wearing it from December to the following September I can say he is quite cured and is now serving his country in France at his own trade, a shoeing smith. You can make what use you like of these, my thanks.

I am, yours,

Mrs. E. Whittle
(Mrs. E. Whittle.)

The wonderful Brooks Rupture Appliance is made at Marshall, Mich., U. S. A., and will be

SENT ON TRIAL

to any rupture sufferer anywhere in the world to prove its merits, as a Retainer and Cure for Rupture.

The soft automatic cushion is the secret of this scientific invention. No harness, no springs, no hard pads, no "medicine," no misleading promises.

It is to be hoped that readers of this paper will take advantage of this opportunity to cure themselves of this most painful and distressing affliction. Just fill out and mail the coupon.

FREE INFORMATION COUPON

C. E. BROOKS,
