For Hospital and Invalid Furniture.

# The Weldon "Auto-Motive" Crutch.

(Pat. 105,185—1916)

FOR LOCOMOTION WITHOUT EXERTION.

Owing to the unique construction of the base, the user is propelled by gravitation without any exertion beyond resting the weight of the body on the handles.

In proceeding down hill it is only necessary to reverse the crutches, which then act as a natural brake.

But the feature of the "Weldon Auto-motive" is the anatomically correct position of the head, which conforms to the oblique direction of the axilla.

At the same time the segmental bases are parallel to each other and to the line of progression. Thus all risk of "crutch paralysis" is entirely eliminated, there being no irritation of the brachial plexus, as is common to all crutches with parallel heads.

27/6 per pair. With Seat, 29/6.  
Carriage and Packing Extra.

A most Instructive Booklet issued post free on request.

# PERSISTENT HÆMORRHAGE

HÆMOPHILIA, PURPURA, MELÆNA, HÆMATEMESIS, HÆMOPTYSIS, POST-OPERATIVE HÆMORRHAGE, ETC.

**COAGULOSE** (P., D. & Co.), obtained by precipitation from normal blood serum, is a valuable agent for the control of hæmorrhage due to defective coagulation of the blood.

It contains the fibrin ferment of fresh serum in a stable condition, and free from the undesirable albuminous constituents normally present in serum. It is rigidly standardised; its purity and activity are guaranteed.

In cases of inaccessible hæmorrhage, Coagulose should be dissolved in sterile water and injected subcutaneously. In bleeding from accessible surfaces, Coagulose may be dusted over the part or applied on sterile gauze.

Further particulars will be sent on request.

**PARKE, DAVIS & CO., 50, Beak St., Regent St., LONDON, W. 1**
