

1. The primary purpose of this study is to determine the effect of the independent variable on the dependent variable.

2. The study is designed to be a quantitative research.

3. The study is designed to be a descriptive research.

4. The study is designed to be a correlational research.

5. The study is designed to be a causal research.

6. The study is designed to be a comparative research.

7. The study is designed to be a longitudinal research.

8. The study is designed to be a cross-sectional research.

9. The study is designed to be a case study.

10. The study is designed to be a focus group.

11. The study is designed to be a survey.

12. The study is designed to be an experiment.

13. The study is designed to be a naturalistic observation.

14. The study is designed to be a participant observation.

15. The study is designed to be a content analysis.

16. The study is designed to be a discourse analysis.

17. The study is designed to be a grounded theory.

18. The study is designed to be a phenomenology.

19. The study is designed to be a hermeneutic.

20. The study is designed to be a narrative research.

21. The study is designed to be a qualitative research.

22. The study is designed to be a quantitative research.

23. The study is designed to be a mixed methods research.

24. The study is designed to be a participatory action research.

25. The study is designed to be a community-based research.

26. The study is designed to be a translational research.

27. The study is designed to be a systems research.

28. The study is designed to be a complexity research.

29. The study is designed to be a network research.

30. The study is designed to be a multi-scale research.

31. The study is designed to be a multi-disciplinary research.

32. The study is designed to be a transdisciplinary research.

33. The study is designed to be a holistic research.

34. The study is designed to be a systems thinking research.

35. The study is designed to be a systems change research.
