

APPENDIX

SUGGESTIONS MADE BY MR. H. J. McINTYRE AND SUBMITTED BY MR.
J. S. TAYLOR, M.P. (*Nanaimo*)

1. A national ballot to obtain names of parties only.
2. In order to qualify as a party entitled to appear on the national ballot, a proposed party must be organized in at least five provinces (or as the law may deem reasonable).
3. The government in office would occupy the top position in all printings on the national ballot, and the remaining parties would occupy positions in order of their strength in the house.
4. Candidates not endorsed by any national party would appear at the bottom of the ballots printed for the affected constituencies.
5. Voters when voting would mark a cross opposite: Liberal, Conservative, C.C.F., Reconstruction Party, or other as they see fit, or opposite the name of an individual if he or she is their choice.
6. Subsequent to election, or prior to election, parties would choose their best men to fill the successful seats.
7. Members would be elected in ratio of votes cast. Ratio to be ascertained from the total vote cast in each province divided by the number of seats in such province. After this division is made, if a few seats remain, these should go to the parties or individuals having the next highest number of votes.
