HIDES AND WOOL.

Prices delivered in Toronto, furnished by John Hallam:
City Hides—City butcher hides. Greening apples at 43,50 to 51,50 per 10,11 quart; brancher and the surfaces of th

The present bottom of the winze is about 570 feet below the surface, and as soon as a station is completed at or near the contact, the development of the veins will begin.

The exploration, on the contact, of the nine veins which show on the upper levels will be very interesting to Ophir shareholders, as good silver values were found in several of them at different points. The most important values were found within a comparatively short radius from the winze, and it is confidently expected that improved values and more permanent ore bodies will be discovered near the contact. The recent success at the Adanac Mine, just north of the Ophir, is encouraging to those who are developing the Ophir property.

MCINTYRE'S HOLDINGS.

Canadian holdings of McIntyre Porcupine Mines have steadily increased during the past year. It is stated that at the present time in the neighborhood of one million shares of this company have been added to the holdings of Canadians during the past year, a correspondingly smaller number of shares being across the border.

PREFERENCE IS ASKED FOR GOLD PRODUCTION

London. Oct. 3.—At a meeting of the London Chamber of Commerce a resolution was passed asking the government to treat gold production preferentially.

H. C. Blyth said that the government had been informed that if it desired the continuance of the supply of gold, arrangements must be made to give gold producers a better price.

OUTLOOK ON ADANAC.

A Cobalt wire to Hamilton B. Wills yesterday said: The Adanac vein now being drifted on is stronger and more heavily mineralized than ever. Manager reports that it looks very fine, over 14 inches wide at bottom of the drift, and he says he is confident they will have high-grade ore in the next four or five rounds.

PRICE OF SILVER. Bar silver at New York, \$1.01%; at ondon (fixed price), 49%d.

The Star of the Gold Stocks In the Ascendant

The trend of the gold securities in the mining market has definitely turned. The big advance is on. We want every one of our clients to share in the gains that are being made and the bigger ones that are to be made yet. The way to participate is to BUY THE "GOLDS."

If you hold Dome, Hollinger, or McIntyre at higher prices than the present market, buy more and average down. If you don't hold any of these, buy

A Big Market is Coming

Dome, Hollinger and McIntyre-A Trio of Opportunities. Here are the figures that show what these stocks

are doing. Examine them carefully. Present Market High 1916 \$10.75 \$9.00 \$10.25 5.10

5.15 1.51 McIntyre 1.27 1.51 Accumulation is going on in these issues which is likely to be followed by widespread buying as peace approaches and the adverse conditions are superseded

by the period of prosperity that is coming. Compare the present market price of these issues with the high levels established before the labor situation became so oppressive. IS IT UNREASON-ABLE TO ASSUME THAT THESE FIGURES

WILL AGAIN PREVAIL? WE BELIEVE THAT THEY WILL-WE GO STILL FURTHER, AND PREDICT THAT THESE STOCKS WILL SELL HIGHER THAN EVER BE-FORE, BECAUSE THE MINES ARE BIGGER THAN THEY EVER WERE.

DOME. Since the mill was closed down at the Dome and the policy of conservation of resources adopted successful efforts have been made to develop the ore

bodies underground. The main shaft has been sunk from the 800-ft. level to the 1,200-ft. level and extensive exploration ment work has materially augmented the

This work is preparatory to the resumption of mining and milling on a scale hitherto never attempted at the Dome, as soon as the labor supply becomes more plentiful.

Though the Dome is not producing, or paying dividends at the present time, it is potentially a greater mine than ever before. Dome stock, at present market prices, possesses tremendous mining and market possibilities.

HOLLINGER.

Hollinger, despite lack of efficient help and the fact that only one-half the milling capacity is being utilized, is turning out more bullion than at any time previously in its history. Production is being maintained at the rate of \$6,000,000 annually. The surplus of the company is understood to be over \$2,000,000 and steadily increasing, while an interim dividend is being distributed every two months.

Ore reserves, given in the last annual statement at \$40,000,000, are increasing all the time, and development underground has reached 'an advanced'

Hollinger shares promise to yield dividends for years to come.

McINTYRE.

Production at the McIntyre is running in the neighborhood of \$1,700,000 annually with profits of about \$800,000, while a 15% dividend is being paid, which leaves a substantial surplus to provide working capital. McIntyre also is carrying on aggressive development work, chiefly on the 1,000-foot level and below, where it is proven that average values are higher than on the upper levels of the mine. Developments at depth on the McIntyre are making it one of the biggest gold mines on the continent. McIntyre is one of the best, it should be bought.

FOR SPECULATIVE INVESTMENT WE RECOMMEND DOME EXTENSION, DOME LAKE, NEWRAY AND WASAPIKA. ALL OF THESE SHOULD EXPERIENCE MATERIAL MARKET ADVANCES.

Immediate action means profits gained—procrastination, profits lost.

P. S.-Last week we advised all of our customers to sell HATTIE GOLD MINES. The stock a that time was selling at 68c.

Our prediction has been borne out by a break to below 50c. We think it is a good buy at around these figures.
