**THE GREAT BENEFIT OF LIFE ASSURANCE** to all Classes of Persons, and especially to those beginning the world with small means, is daily becoming of greater importance, and as it becomes better understood will no doubt be much more generally attended to. Nothing is so uncertain as the life of a single individual, and it is a sense of this insecurity that has given rise to Life Assurance Societies. No prudent man of property neglects to make his Will while in health—the Christian merchant does not often neglect to insure his ships or cargoes, or his house and stores, then why should it be thought improper for any man to make provision for his Family after he is gone, by becoming a Stockholder in a Life Insurance Society?—which he may do, by Insuring his Life,—by which his Family may, (should he be suddenly removed from them) reap a much greater benefit than they could possibly do were he to invest the same sum for their benefit in any other way. Persons in the rural districts and particularly young married men, are particularly invited to attend to it while in health. The above Society offers as great inducements as any other kindred association—their Rates being rather under the others, and the Share of Profits in which the Assured may participate being greater, Viz.: 90 per cent. of the whole. Pamphlets containing the Rates and every information, and all Blanks, furnished by the Agent. The Medical Examiner's Fee, in all cases, paid by the Company.
