THROUGH CO-OPERATION STRIKES **WERE PRACTICALLY ELIMINATED**

Have you ever gone through the agony of needless delay after delay in waiting for your new house! Or for your quarters in the new office building? Or even for your garage? Have you weat blood while your carpenters fought with your metal workers as to which craft should put in the metal trim on your job! Have ou had them both walk out because they could not agree, and leave you literally holding the sack through no fault of your own?

The problem of the jurisdictional strike-those quarrels in which men quit work not because of wage disputes, or hours, or rouble with the boss, but because the unions themselves could not informed by the chairman of the but it must 'a been funny!" sgree as to which should do certain parts of the job—has been olved.

And it was solved by those most intimately concerned by the imple expedient of getting round a table and putting all the eards

With speed, but not without difficulty, a board composed of With speed, but not without difficulty, a board composed of ince of Quebec, affiliated with the another friend described how "the era into the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meantime, reinforce employers, through necessity, being company bull (guard), ye see, was in the smoke box, "if the head, but in the meant rith the public's representative from the United States Depart ent of Labor, found a common ground for agreement.

It is an amazing fact that this board accomplished in a few nths what the employers and laborers had been struggling to lo for more than twenty years. Since the board came into existnce millions upon millions of dollars have been saved for builders nd many more millions to the laborers, in time. But most im ortant of all is the restoration of morale in the workers.

Moreover, the work of this board has dried up the greatest irce of labor graft. Overnight it destroyed the weapon that ande possible extortions of men like the late "Skinny" Madden f Chicago and Bob Brindell, late of New York but now of Sing

Although the jurisdictional strike had been practiced for a larter of a century, not many realized how its tentacles reached a larter of a century, not many realized how its tentacles reached larter of the United States supreme through the least like this. Probable the larter of the United States supreme through the least like this large the larter of the United States supreme through the least like this large that the large through the least like this large through the least like the large through the large through the least like the large through the least like the large through to the vitals of the building trades. Through it building in court declaring unconstitutional hole cities was tied up season after season, contractors and in- Pennsylvania law forbidding the minstors were forced into bankruptcy, while workmen, who perhaps ing of anthracite coal is such a way striker here-just for tresspassin'," gettin' free board and room at the ould stand the loss least of all, lost weeks and months of em- as to cause a cave in of the surface said the marshal in another railway camp-an' taking no chances on get-

Because of it no workman leaving home in the morning for his lace of employment was sure that he would not be on strike before coal companies can-and of course ace of employment was sure that he would not be on strike before comes up town we area, and travel far into the hinterland, north to5,0000 through the elimination of cess.' This appeal was issued to write a day was out, not on account of wage dispute or any other will—continue their policy of reckless rying a gat—if he has one, or for wrenches we would sit at the entrance of Cold lake, where but few white of overtime pay Pilfering also had employes of the Canadian National ifficulty with his employer, but because the representatives of we unions differed as to whose men should do a particular job.

With men of one trade off a building, work on it soon ceased, or the trades are interdependent. Nor did it help any for the emloyer to fill the places of the craft that struck with nonunionists. When he did so, the other crafts quit, anyway. Whichever way he urned, he was between the devil and the deep blue sea. The rank taken after homes, school buildings, engines, numerous trains were being and file of the workers were no better off.

Business Agents With Itchy Palms.

Moreover, honest disputes were not the only difficulty. Where, very frequently happened, business agents developed itchy ns, it was an easy matter to set up a technical dispute that had actually killed a number of persold only be settled when the itch was cured by coin of the realm sons that the citizens of mining towns So at a great terminal I had to pack house. eely applied.

After my week in a foundation of the conceive from possessions are using as the condition of the amendment of that department, replied that they would well-ies, and there the law was killed.

States supreme court by the companies and not a helper's job, ing any degree of either skill or relief, and there the law was killed.

Continued on Page 4. articularly the architects, the so-called "aristocrats" of the instry, "who had previously held aloof from all labor matters."

With their assistance and that of John B. Lennox of the Detment of Labor, it was, after much discussion, arranged to set a Manpreme court for the building trades" to be made up of reesentatives of all elements in the industry—the investor in the sentatives of all elements in the industry—the investor in the SUPPORTS REPORT son of the architect, the contractors, the engineers, and labor, ith the latter in the minority.

Accordingly, nine months later in Atlantic city, the National ard for Jurisdictional Awards in the Building Industry came o being with Mr. Russell, representing the architects, as chairan; E. P. Miller, the American Engineering Council; Colonel J. Wiggin and F. J. C. Dresser, the Associated General Contractof America; E. M. Craig, the National Association of Building rades Employers, and John J. Hayes, Thomas L. Preece, and illiam L. Hutcheson, the unions, with William J. Spencer, cretary of the Building Trades Department of the American at third of the number of members of the profession who were candidates.

Recently a Labor member was observed to be reading an evening newspaper. He was promptly called to order by the chairman and felt like a credit of the controlling the miners of the profession who were candidates. The trade union officials were more configuration of the controlling the miners of the leaders of thought in the councils of the carried unanimously welcoming Arthur Henderson, as secretary, but without a vote.

The trade union officials were more configuration of the configuration

To this body the seventeen building trades unions in the ferring of honors and supporting his recommendation factor agreed to refer all disputes, the chnical men agreed to write decisions, when made, into all constructions and supporting his recommendation that political honors should be abolished at the ferring of honors and supporting his cord of two years' work, just publicated by "Area of two years' work, just publicated by "Area of two years' work, just publicated by the recommendation of two years' work, just publicated by "Area of two years' work, just publicated by the recommendation of two years' work, just publicated by "Area of two mical men agreed to write decisions, when made, into all conts, and the employers to stand on the specifications. Each
