NOTES AND NEWS. "I am astonished, my dear young lady,

at your sentiments; you mad' me start!" "Good! I have been wanting you to start for the last hour." applause in this country yet. When, in an Italian opera house, an artist performs a difficult passage accurately and well, a murmur of approbation pervades the house, and the diva is happy. Here we wait until the piece is over, and, with horrid and barbaric discord, repay her for her harmony and culture.

St. Michael the Archangel, going into a church in Paris, where there was a representation of that saint discomfiting the devil, put one large taper close to St. Michael, and another close to the flend. "Woman!" exclaimed the priest, "you are making an offering to Satan; you know not what you do." "I know what I am doing well enough," was the reply; "but as I do not certainly know where I am going, it is as well to have a friend everywhere." General Macquarie, by a distribution

General Macquarie, by a distribution of seeds and implements, attempted to induce the natives New South Wales to cultivate the ground. Among the packets of seeds were some which contained fishhooks; these, together with the seeds, were given by the Governor to the sable monarch, King Bungaree. Some time after, the Governor inquired of him whether the seeds had yet come up. "Oh, berry well," exclaimed Bungaree; "they all come up berry well, except dem fishhooks—dem no come up yet."

A correspondent of the Indiana Far-A correspondent of the Indiana Far-

mer illustrates as follows the amount of travel necessary to raise a crop of corn: "I have a 20 acre field 40x80 rods. To break this up would take 100 miles; harrowing it about 40 miles; furrowing out, 90 miles; planting, 45 miles, if with a planter, and if dropped and then covered, 90 miles. Thus you see it takes about 800 or 900 miles of travel to raise twenty acres of c. ra, not coulding going to or returning from the field. Besides, there are replanting, thinning, rolling, etc."

Specific Cure for Meningitis. A Michigan correspondent of the Freeport, Ill., Bulletin pronounces what is gitis, now prevailing so extensively and fatally in many parts of the country as he same epidemic which raged in Michian about twenty-five years ago to such an extent that it actually broke up the an extent that it actually broke up the legislature and carried to the grave every one whom it attacked, until the old fashioned hemlock sweats were adopted, after which every one was saved. He says:

Our people sent about twenty-five miles distance and procured hemlock boughs, and they sent for it from all parts of the State. There was a company called the Hook and Ladder Company, and for weeks they did nothing night or day but go from house to house giving hemlock sweats, and it never failed to save every case. Thorough sweating might do, but there is no mistake about hemlock sweats being a specific.

First, as Usual!!

Three years in succession. The Osborn was duelph, 1874, the first prize for Family Sew ing Machine, and second prize as Manufacturing

Irishmen. The modern Irishman is of no race, so

ended now is the blood of Celt and Frenchman. The Irishman of the last entury rose to his natural level whenver he was removed from his own unappy country. In the Seven Year's War Austria's best generals were Irish men; Lacy was an Irishman; O'Donnell's name speaks for him; and Lally Tollendal, who punished England at Fontenoy, was Mullally of Tollendally. Strike the name of Irishmen out of our own public service, and we lose the heroes of our proudest exploits—we lose the Wellesleys, the Pallisers, the Moores, the Eyres, the Cootes, the Napiers; we lose half the officers and half the privates who conquered India for us, and fought our battles in the Peninsula. What the Irish could do as enemies we were about to learn when the Ulster exiles crowded to the standard of Washington.—Froude's History of Ireland, Vol. II.
