QUEBEC LUMBER MARKET.

Quebec, Dec. 8th, 1863,
Having made up the Returns of the
Supply, Export, and Stock of Timber for
the present season we forward them for your
perusal, together with a Comparative Statement for the past five years preceding, with
Prices Current annexed. In taking a review of our trade for the past year, we find that an excessive production of all descriptions of wood has been followed by the usual onsequence of low and unremunerative prices, threatening us at one time with one of those periodical crises with which the commercial world has been hitherto visited from time to time, and our escape from worse evils than those which have really befallen us, appears to be in great part due to the fact that the period has not yet come round, and that trade has not had time fully to develope the elements of unsoundness, which it seems to require a decennia commercial storm to sweep away; and with-

together avoiding panies for the future we may reasonably hope that the hard times of the autumn may have the effect of postponing if they cannot altogether avert the visitation of commercial trouble, which would otherwise be due some time about the year 1867 : let it suffice for the present to congratulate ourselves that the evil which at one time seemed imminent, has for the present been averted, and to hope that dear bought experience will check further imprudence, -with regard to the article of White Pine. The stock on hand to winter over is of square 17,561,000 against 13,008,578 ft. last year, and of waney 301,204 against 1,224,365 at the same period; although the export of the article has been over an average, being as per Custom Returns (including square and waney) 20,032,520, still the very large supply that our markets have received, amounting, as per Supervisor's return, to 23,737,268 of Square and 735,-360 feet of waney, have had the effect of keeping our market in a dull and depressed state during the whole Summer, if we may except really good timber of 60 to 70 feet average, for which there has been a fair demand throughout the season. A large proportion of the stock wintering is of 53 feet average and upwards, and nearly all that is of good quality is in the hands of shippers, there being but few good rafts for sale, while almost all the inferior wood has been obliged to winter over in the hands of the producer, there being no disposition whatever to purchase it. As we do not

hear of any contracts having been made for the delivery of timber in our market for next season, (except to a very trifling extent) it is to be hoped that this circumstance 5th inst., a French Canadian, named Jos- will have its due effect in moderating the production this winter within its legitimate bounds, and from what we hear of the pre-parations going on for another years supply, there seems every probability, we may say certainty, that the manufacture of this arti cle will be conducted on a greatly reduced

THE TRIAL OF PROFESSOR

DEMME The trial of Dr. Demme and Madame Trumpi, in Switzerland, on the capital charge of having poisoned M. Trumpi, has been brought to a close. The evidence produced was, at least, as consistent with the opinion that M. Trumpi had committed suicide as with the suspicion of murder. The medical experts, with one exception, confined themselves to the proof of the fact that the poison had been taken voluntarily, and not by accident. The question whether it had been administered to the deceased by his own hands or those of others was left to the jury. On this point a curious demand was made by one of the counsel. He desired to prove that the bitterness of strychnine was so great that it was impossible for ten grains of that poison to have been given without causing an attack of vomiting He, therefore, required that the jury should emselves taste and report on it. corror-struck faces the jury declined to make the trial. At last, the foreman, with a deep sense of his responsibility, consented to experimentalize in this novel line of tasting, only requiring the physicians present to measure the dose given to him with extreme accuracy, and to take every possible precaution to neutralize its effects.
Such a Curtius-like devotion to the cause of justice is worthy of a world's admiration.

Moved by Mr. Campbell, seconded by Mr. Yuil, that the clerk be instructed to take measures for renewing the insurance of the Town Hall. Carried.

Emmert. This gentleman was known to be a personal enemy of Dr. Demme, and his wife was strongly suspected of having written certain anonymous letters, which chiefly led to his trial. His report travelled out of the regular path of medical evidence to assert the guilt of Dr. Demme. He had recollected and commented upon all the testimony against him. Even when under examination in court he persisted in the same course, quarreling with his counsel, Distressing details are published of same course, quarreling with his counsel, wrecks and serious loss of life on the Eastoner in his anxiety to procure a conviction. His conduct was a diagrace to the medical profession, and was received as such by the crowds of students who had assembled to hear the case; he was at last called to order and silenced by the judge, who found it difficult to repress the storm of indignation with which the audience received the evidence. The evident animus of this important witness told greatly in favor of the prisopers; and when it was found that M. Trumpi had allowed his affairs to become involved, that he had often openly spoke of committing suicide, and that he had bought strychine from more than one person shortly before his death, the jury could scarcely, consistently with their oaths, have brought in any other verdiet than that of "Not Guilty." Dr. Demme's suspicious conduct is explained to some extent by the supposition that he was cognizant of the suicide, and was desirious, for the sake of his friendship with the deceased and his family to conceal it. In addition to the verdict of "Not Guiily," the jury awarded damages to Madame Trumpi," whose reason, it is

so of language they may have been written."

"NO MORE"

"No more !" what a weight of sorrow is in these words. Hundreds have uttered them in moments of despair! Like the grand and solemn roar of a cataract, or the majestic and solemn crash of an avalanche, as it comes sweeping down, are they. How often, like a sudden clap of thunder, they come upon our mind—"No more." But never do they strike one so forcibly as when death enters our homestead, when we find the spirit of the loved one is indeed gone to that other land, borne on the wings of the destroying angel; then, in a moment it flashes upon us, we shall hear the cherished voice on earth "no more;" hushed for ever is the laugh which made music in our ears; the loving eyes will never beam on us here again; and the cheerful step glad den our heart "no more." The loved one hath gone to that other world where these mourntul words have another meaning there it it not that joy and happiness wil be "no more," but sorrow, trouble, disappointment, and pain. Every day we verify the words, for each minute as it passes, we can recall "no more." It is written all over the earth. The flowers are first buds, these ripen into blossoms, and these soon fade away, and we see them "no more."
