Summary of Pre-Budget Meeting Enclosed

The Brunswickian

VOL. 64, No. 12

FREDERICTON, N. E., WEDNESDAY, JANUARY 24, 1945.

Price Seven Cents

TRAVELLING BOARD TO BE HERE THURSDAY

Students Honoured; Turner at Meeting

It has just been announced by the Engineering Institute of Canada that the Martin Murphy prize for an original paper on any Engineering subject has been awarded to Mr. James L. Belyea and that Mr. Fred W. Davidson was awarded second place.

Mr. Belyea was a '44 graduate in Electrical Engineering and the subject of his paper was "The Cathode Ray Oscilloscope and its application to industry." At the present time Mr. Belyea is Radar Officer with a unit of the Royal Canadian Navy.

Fred is one of our Senior Electricals and has been very active in the Engineering Society. He is the present president of the Society, and last year was winner of the Junior Engineering prize for the most efficient Engineer. The subject of Fred's paper was "Principles of the Transformer" and he received high commendation from the selective committee.

The fact that our present and past students have done so well in open competition speaks very highly of our Electrical Department and with the new facilities this department will offer every opportunity to the present students. (Continued on page five)

I.R.C. to Hear Dr. Wright

Plans for this term were made at a recent meeting of the executive of the International Relations Club. From time to time outside speakers will be invited to address the members. Whenever noted people are in the city, the Club plans to take advantage of the opportunities provided. It is hoped that speakers representing the various political parties can be secured to present their views to the Club.

A further project which has been suggested is a Mock Parliament. If this plan is carried out, a discussion, patterned after the debates in the House of Commons, would be conducted. It would deal with some of the questions affecting the country as a whole. In this way, students could familiarize themselves with parliamentary procedure and could become more aware of some of our post-war problems.

For the first meeting, which is to be held Wednesday, January 24, at 8 p.m., Dr. Bailey's Lecture Room, the Club has invited Prof. Wright to speak on "The Impact of Science on International Affairs." Dr. Wright who has made a number of radio addresses on related topics, has promised a talk both informative and interesting.

Dr. Prince, president of the Rotary Club, has expressed his willingness to aid the I.R.C. by getting guest speakers at the Rotary to address the members of the Relations Club.

Victory Ball Plans Made

The War Effort Committee called together last Tuesday evening, January 16, by Chairman Stuart Baxter, rolled up, sleeves and went to work for a two hour session. By the end of the meeting plans had formulated for the annual Victory Ball.

The formal will be held in the Gym on February 2, with dancing from 9 p.m. until 2 a.m. Arrangements for music have not yet been completed.

Students will be admitted for \$2.00 per couple, while admission for others will be \$3.00 per couple. Helen Gibson and Eric Teed, who are in charge of decorations, intend to use flags of the United Nations as part of a patriotic theme. (Continued on page five)

First U-Y Group Formed on Campus

On Saturday, January 13, the U-Y Club held a supper meeting at the Community Y. Professor Wright was the speaker and he gave a most interesting and rambling talk on service clubs and different methods of doing services. There were also several guests present.

A short business meeting was held and a new project brought up and discussed. This project is the collecting, arranging and presenting to the library of old examination papers. All students who have old paper dating from B.C. to the future are asked to give them to any U-Y member. (Continued on page five)

DISCUSSION HELD AT S.C.M.

The first meeting of the S.C.M. this term was held in the "Y" room last Sunday night. A brief business meeting was held. Bob Lawrence read a letter from the S.C.M. at Dalhousie University. A meeting had been held at Dal earlier this month to discuss the possibility of having a Maritime Secretary for the S.C.M. The idea was discouraged both by the group at Dal and by our own S.C.M. Roy McInerney reported that the sale of student directories this year had been very successful. The possibilities of a social were discussed, but no definite agreement was reached.

Mr. McPherson, pastor of George St. Baptist Church, led a group discussion on the intellectual problem. (Continued on page five)

OPPORTUNITY FOR NON-TECHNICAL GRADUATES

A travelling board of personnel consisting of officers of the Army and Navy and representatives of the Wartime Bureau of Technical Personnel will visit U.N.B. on Thursday, January 25. Interviews for seniors will begin at 8.30 a.m. and will probably be completed during the forenoon. The average time for an individual interview will be ten minutes.

Seniors will be interviewed in the afternoon and technical students of both the senior and junior classes will attend a meeting at 4 p.m. when they will receive information regarding the man power controls now in effect.

Every student who is graduating in 1945 in Engineering or Science and who has indicated on his de- (Continued on page five)

Ottawa Calling

A Canadian University Press Feature
by Neil MacDonald
SELECTIVE SERVICE

OTTAWA: Right now, there's a good deal of activity in Selective Service Headquarters here and rumours are floating around about a revision in the call-up regulations as they affect university students. No one in authority will do more than say that the regulations are subject to continual review, that they are therefore under consideration now, that the manpower situation is growing more critical, and that it is possible a revision may be necessary.

It is obvious, of course, that if the regulations of Selective Service (Continued on page five)

Chemical Society Hears Dr. Toole

Amidst the inspiring atmosphere of test tubes, beakers and bunsen burners, the Chemical Society held its first meeting of the present term last Wednesday evening in the Chemistry lecture room. For the first time since re-establishment, the society was privileged to hear Dr. Toole, who gave an interesting talk entitled "The Social Function of Science." He told about the gradually increasing impact of science on human welfare and especially stressed the relationship between the progress of science at a certain stage and the economic conditions which prevailed at that stage. Dr. Toole illustrated the importance of the scientist by pointing out that the scientist, who, previous to the last war, was regarded as a luxury, is now regarded as an absolute necessity. At the close of the talk a discussion period followed during which tea was served. (Continued on page five)

Gruesome Setting At Old Time Party

College Play Next Month

"Yes, my dearest!—now tell me... Cedric please don't stutter so. Don't be nervous."

"Oh, my darling! Oh, my sweet. You don't know how I've prayed for this, every night on the boat... Darling, yes, YES, a thousand times yes!"

Here it is everyone, the big news is out at last about the Dramatic Society play. The above is a snatch from the three act comedy "The Man Who Came to Dinner" by Moss Hart and George S. Kaufman, being February 8th and 9th by our own society.

The Dramatic Society play this year is sure to be of the usual high standard. The play was written by (Continued on page five)

House Makes Plans For Annual Dance

The residents of "The House" met last Wednesday night in the lounge for their first regular meeting of the term. Routine business was brought up. The financial statement of the society was read by the president, Fred Davidson.

The most important topic of the meeting was the planning for the annual "at home" night—the House Dance. Preliminary arrangements for the dance were made. Uffe Andersen was elected as chairman of the dance committee.

Always considered as one of the finest social events on the campus, the dance this year is expected to live up to its same fine tradition. (Continued on page five)

DR. PETRIE AT NEWMAN CLUB

Sunday evening Dr. Petrie addressed the Newman Club on "Post War Reconstruction in New Brunswick." He began his address by describing the economic history of our province from the early nineteenth century until the present period. With this background of information laid, Dr. Petrie went on to discuss the opportunities which could await New Brunswick in the post war era.

All through his address the important position of the lumber industry in regard to New Brunswick's economic system past, present and future, was strikingly shown. He went on to explain that New Brunswick as an export country must put her own house in order before hoping to compete in peace. (Continued on page five)

Last Friday night Memorial Hall sprung to life as the Pre-Med Old Time Party got underway. Plaid shirts with tails out, loud sox, and a flood of bow ties decked out the guys and gals. At 9.30 p.m. the familiar strains of the Depo... ooooo! the unfamiliar strains of the Five Jacks, featuring a drum, let loose with a quaint rendition of some nameless melody. By 10 the hall was shaking.

The decorating scheme was made up of bones, skulls, hands, feet, salvaged no doubt from victims of last year's Barn Dance. Pop and ice cream made up the refreshments.

But let's look around and see what's none of our business. Evans—dressed for a masquerade—must have arrived at the dance by mistake. Kay, minus tooth, enjoyed a pipe smoke. As Maye arrived she dropped a warm pair of red handkerchiefs(?) No one picked it up for her. Then Boog arrived with a surprise. With Lawrence enjoying a strong coke, and a few upstarts getting green on their first cigarettes, let's get back on the floor.

By this time, the Society has acquired a reputation—for the or- (Continued on page five)

Listeners Hold Meet.

Proving itself to be doing a worthwhile job as well as having a lot of fun at the same time is the S.C.M. listening group.

This small band of disciples congregates every Tuesday night in Mrs. Thompson's apartment in the Arts Building to hear "Of Things to Come."

The group, one of the coziest of organizations, every so often has a "refresher" meeting on another spot of the campus: "Easel Inn", better known as the Observatory and Art Centre, where four or five couples, as the case may be, discuss in the midst of pine-scented stuffed fawns, cob webs, and brush-marked canvasses.

The "Two Maes" provide a taxi service for the gentler members both to and from the meeting; great fun!

While watching the clock intently to be it time for the program, we finally hear the station call by our own silver-tongued announcer. After the program there followed discussion on the materials presented.

Back through the snow the band wends its way homeward after the session, returning Stu Baxter's radio to him.

This listening group is the first to be started on the campus. The purpose is to listen to the program and send in answers to questions which are sent to the various listening groups from the provincial office.
