Rt. Hon. Arthur Meighen,
C/o Canadian General Securities,
Toronto, Ont.

Dear Mr. Meighen:

I do not like to bother you but would like to get a little information on some stocks. The market has been a very remunerative field for many during the past several months and I have been following the market in the papers as closely as possible, although have not of course made any kind of a study of it. I have hesitated about putting any money into the market because I kept thinking all the time that the turn must surely be coming and as a result of my temerity have lost plenty of opportunities to make some money. At the present time I have been wondering what to do and realizing that it is poor policy to get mixed up in something about which a person knows nothing and rather dangerous, and not knowing anybody that was competent to give advice or in whom I had confidence, with the exception of yourself, I have not bought anything at all as I did not like to bother you. However I would like to know your opinion, if you would care to give it on the following:-

International Nickle
Brazilian Traction
Power Corporation
North Star Oil
Winnipeg Electric
Steel of Canada

Cockshutt Plow
Massey-Harris (Common)
Quebec Power
Standard Oil of New Jersey
Can. Car (Common)

I almost telephoned you last night
