DAN PATCH RESTORED TO HEALTH IN SIX WEEKS.

DAN PATCH GIVEN UP TO DIE

Office of the Kansas City Veterinary College, 100 S. East 15th Street.
ROBERT C. MOORE, D.V.S., PRES. HENRY C. BARBER, M.D., D.V.S., V-PRES.
HENRIETTA E. KILPATRICK, D.V.M., V-PRES. SIMON BRYANT, D.V.M., S.E.
 Dan Patch was bred and raised in Dan Patch, Ohio, and was owned by Dan Patch, Ohio. He was suffering severe pain in the abdominal regions caused by impaction of the bowels probably caused by eating wet chaff. His pulse rate was 75 per minute and his temperature 100. The character of the pulse was weak. The condition gradually grew worse during the afternoon until about 4 p. m. the pulse rate had reached more than 100 and his temperature was 102. The heart grew so feeble that the pulse could not be taken at all and the pulse motion was determined by listening to the heart valve. A mild purgative covered the entire body except of the head and the pulse was almost non-existent. The visible mucous membranes were highly injected, which with the high temperature showed unmistakable evidence of the infectious condition existing in the abdominal cavity. At this time owing to the infectious condition and the extreme heat the prognosis was very unfavorable. From 4 to 8 p. m. I had hope or no hope of his recovery. About 7 p. m. a slight improvement was noticeable and his condition gradually improved. Very truly yours,
 E. C. MOORE, D.V.S. and E. KILPATRICK, D.V.M.

HIS WONDERFUL RECOVERY

In four days from the time he was given up to die by three high class Veterinarian surgeons we shipped Dan Patch from Toledo to our "International Stock Food Plant" at Newark, N.J., and commenced feeding him three times the usual quantity of "International Stock Food" each giving it to him four times per day. He showed his strength very rapidly and in three weeks from the first day he showed he could pace at 1:56 and in four weeks from the date of his arrival he showed he was capable of pacing a mile in 1:10 without wind alone. "International Stock Food" is a remarkable medicinal preparation to give permanent strength to the entire system as well as being a powerful laxative and antacidulant. It is used and endorsed by a majority of the great veterinarians and is constant use on most horse-breeding farms. Dan Patch has been fed "International Stock Food" every day since we bought him and he has been strong and vigorous. Being in his normal condition, Dan Patch is able to withstand his severe sickness. You could not see Dan Patch if of the superior merits of "International Stock Food" which you can find at a cost of
3 FEEDS FOR ONE CENT.

INTERNATIONAL STOCK FOOD CO., TORONTO **HIGH RIVER SCHOOL OF AGRICULTURE, High River, Alta.**
 Dan Patch— I thank you for your letter of the 10th, and for all the trouble you have taken in having the "International Stock Food" to make. The results of the food fed to him in a short or long time were not unknown to me before your communication came to hand, but I had not given it the possible attention for other animals to know. A number of the food with a pan of the suffering from what I diagnosed as "Impaction of the bowels" gradually showed great improvement. After feeding two pans within three days out of a pan of seven I commenced feeding your Stock Food liberally to the remainder, all of which had refused to eat the ordinary food and were sick. On the fourth day it took long time for the remaining four rapidly recovered and are now well. I thank the preparation for food "International Stock Food" all the pain on the farm and in adjoining pastures this outbreak, and quite before have saved myself from serious loss by using your remedy. I am dear Sir, Yours faithfully, **Geo. G. HARRISON, Director.**
