The frame of our new Separator encloses every part of gearing. The bowl casing is a part of this solid one-piece frame, and it is impossible for it to get racked out of true. The base is heavy, and cast in one piece. It is just high enough to lift the frame off the floor, and open enough to allow of sweeping underneath. The top cap lifts off, giving access to the top drive gear. The door in the frame just below the bowl casing opens to expose the worm and lower gear wheel, thus all parts are readily accessible, yet entirely enclosed, so that no dust or dirt of any kind can get to the bearings, nor can fingers or clothing be caught in any exposed gearing. The frame is low. The top of the supply tank is only 34 inches from the floor—just waist high. This allows milk to be poured into it without high lifting, and makes it convenient to use the supply tank for washing the skimming device in. There are no protruding shelves, as your pails can be set on floor safe and solid. The crank handle is just the right height, where your hands grasp it naturally without bending low or reaching. The design of the frame is graceful, and the finish, a rich red, gives it a handsome and distinguished appearance, in keeping with its mechanical excellence.

## WORKS PERFECTLY---WILL SAVE YOU DOLLARS

GEARINGS are all made of the best-known materials, accurately and perfectly cut. There are absolutely no frail parts or intricate intermediate gears to break or get out of order. There is not an interval of lost motion between the teeth of gear, thus insuring steady motion without gear friction. **THE RATCHET**—When you stop turning the handle everything stops turning but the bowl and its directly connected parts. Our ratchet is situated under the spin gear at the top of the shaft. It is positive in its action. **THE PATENT NECK BEARING** is made flexible by means of six finely tempered springs, which are easily adjusted by hand. There is nothing about it to get out of order. **THE BOWL** is made seamless. It is one piece, of Shelly steel. **THE SUPPLY TANK**—This is seamless, is thoroughly retinned, self-draining and round. It has no corners to catch dirt. **CLEANING**—The skimming device is easily cleaned. The discs slip apart on the rack, so that in washing there is not a speck of surface that does not come in contact with the water. We guarantee it.

# ROOFING

**O**UR Stallion Policies, covering against loss by Death through Accident or Disease, are more liberal and afford more protection to owners than any issued by Competing Company. They contain no vexatious clauses, having been drafted to cover the special conditions met with in this Country. They cover the horse no matter where he might be and not merely in his own stable, as certain Companies do. This is very important during

the Breeding Season as the horse might die while being on the road. Do not take any chances by insuring with others, insure with us.

## STALLION INSURANCE

The insurance premium represents only a small proportion of the service fees earned. Better risk the loss of the premium than the purchase price of your beast if it dies without insurance.

Better have and not need than need and not have.
