

# CAUGHT HEAVY COLD.

Left Throat and Lungs Very Sore.

There is no better cure for a cough or cold than Dr. Wood's Norway Pine Syrup.

It is rich in the lung-healing virtues of the Norway pine tree, and is a pleasant, safe and effectual medicine that may be confidentially relied upon as a specific for Coughs, Colds, Bronchitis, Hoarseness, Sore Throat, Quinsy, and all Throat and Lung Troubles.

Mr. S. Monaghan, Charlottetown, P.E.I., writes:—"I certify that Dr. Wood's Norway Pine Syrup is an excellent medicine for coughs and colds. Last winter I contracted a heavy cold which left my lungs and throat very sore. I had to give up work and stay in the house for two weeks. I used several cough mixtures, but got no relief until a friend advised me to use Dr. Wood's Norway Pine Syrup. Three bottles entirely cured me, and I can recommend it as the best medicine for coughs."

Don't be imposed upon by taking anything but "Dr. Wood's" as there are many imitations of this sterling remedy on the market.

"Dr. Wood's" is put up in a yellow wrapper; three pine trees the trade mark; price 25 cents. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

**Southdown Ewes** A few good shearlings, and two-shear ewes in lamb to my Toronto champion ram.

**Angus Cattle** Buy an Angus bull to produce steers that feed easily and top the market. **Robt. McEwen, BYRON, Ont.**

## Cattle and Sheep Labels

Metal ear labels with owner's name, address and any numbers required. They are inexpensive, simple and practical. The greatest thing for stock. Do not neglect to send for free circular and sample. Send your name and address to-day.

**F. G. JAMES, Bowmanville, Ont.**

**Poplar Lodge Southdowns and Berkshires**—I can supply Southdown sheep, rams or ewes, ram or ewe lambs, Berkshires, from youngsters up to breeding age, of both sexes; the highest types of the breeds in proper fit. **SIMEON LEMON, Kettleby P.O., Schomberg or Aurora Stns. Phone.**

BY TELEPHONE.

"My husband is a fool," snapped Mrs. Ower Town.

The visitor expressed only mild surprise, but the suburban lady was moved to explain:

"You know, I wanted to persuade our hens to lay in the nests we provided for them. So I telephoned my husband to bring home a couple of artificial eggs with him."

"Well, and didn't he?"

"Didn't he? The idiot brought home a pair of cork legs!"

## QUESTIONS AND ANSWERS. Miscellaneous.

### HORSES HAVE DISTEMPER.

Is there some disinfectant which we could use to spray mangers to prevent other horses in stable from getting distemper—something they wouldn't lick to poison them? Is it contagious from the nasal discharge or the breath, and how long will the germs live in stable?

T. P.

Ans.—The stable can be disinfected by sweeping and dusting thoroughly, and then giving a thorough coat of hot lime-wash, with five-per-cent carbolic acid. If you do not want the whitewash in stable, you can use a hot five-per-cent solution of carbolic acid without the lime.

### SPRING RYE—CLEANING MAHOGANY PIANO.

1. Where could I get some spring rye and the price of it per bushel?

2. What would be the best kind of stuff I could get to clean a mahogany piano, to remove fly marks? J. B.

Ans.—1. Write the seedsmen advertising in these columns, or failing in that direction, insert a small advertisement in our Wants and For Sale column, rate 3 cents a word. See terms in paper at head of Wants and For Sale column.

2. We offer these suggestions quoted from sources usually reliable. We cannot positively vouch for them. Try them if you see fit. Rub with a little ammonia and water, then rinse well with pure soft water, rub dry at once, and polish with a piece of chamois. Scientific American gives the following as a good mixture for polishing a piano. Alcohol, 95 per cent., 800 parts; benzol, 700 parts; gum benzoin, 8 parts; sandarac, 16 parts. Mix and dissolve. Apply a very small quantity at once, and rub it continuously until it dries.

### CEMENT SILO.

I intend building a cement silo next summer, and I would like to have a better insight into it before starting. May I ask you a few questions, to be answered in your valuable paper. I want to build it ten inches thick and it will be underground about three feet. Now, would it be wise to have the foundation about two feet thick level with ground, and would it do to build it with nice flat building stone and cement, instead of lime, leaving about three inches cement next to inside pattern that will be for inside wall, and when I get it built level with ground to put on outside pattern and go on up with cement ten inches thick, and is one of Portland cement to eight of gravel and sand strong enough? What size would you make doors, and how far apart? Would it do just to put in a pattern, and after it is finished knock it out again, and just leave the cement wall with a groove inside for the door, or would it be better to use a frame, and would you advise me to build it 13 feet or 12 feet in diameter and about 30 feet high? About how many barrels of cement will it take, and what is the price per barrel? Would it do to build two lifts a day? G. B.

Ans.—Practically all these questions are answered in the article, "Construction and Cost of Silo at Weldwood," issue February 1st. You may use stone for your foundation by working them plentifully into the cement-concrete mortar as you fill the mould. Make the cement concrete quite wet, so it will fill in all around the stone. Keep stone well away from face of wall. Your foundation need not be thicker than twenty or twenty-four inches at the bottom, tapering to eighteen inches at the top. One of good Portland cement to eight of good gravel is plenty strong enough, as it is a waste of material to have the wall more than six inches thick at the top, tapering up from ten inches at the bottom. Better make a mould for constructing door openings. You will have a smoother job than if using an ordinary door. Besides, some kind of a mould would be needed anyway. Size depends altogether upon your needs. We would not build a cement silo less than forty feet high. Diameter may vary from twelve to sixteen feet—the latter width only where the equivalent of thirty-five or forty head of mature cattle are to be fed. Using our amended statement as a basis, you may calculate material for whatever size you eventually decide to build.

# Ruptured People— Try this for Relief and Cure

No Loss of Time from Work—You Keep on Earning Money—No Belt, Elastic, Springs, or Leg-straps to Wear—Sent on 60 Days Trial to Prove It

### Curing Begins At Once

This massage is so beneficial—so curative—that 199 people out of every 200 begin to get better and stronger almost the minute a Cluthe Truss is put on—so beneficial that among the thousands of people completely cured by this truss are some of the worst cases of rupture on record.

### Free Book Tells All About It

So that you can judge for yourself, we want to send you—free—our cloth-bound book of advice—it is full of facts for the ruptured never before put in print—facts we have learned during forty years of day-after-day experience.

It explains the dangers of operation. Explains why wearing ordinary trusses is simply slow suicide. Tells why drug-stores should no more be allowed to sell trusses than a schoolboy would be allowed to perform an operation.—Also exposes the fake "methods," "appliances," "plaster pads," fake "free cure," etc.

And it tells all about the Cluthe Massage Truss—how little it costs—how it ends all expense—how it is waterproof and can be worn in the bath—how it has no belt, elastic band, springs or leg-straps—no "harness" of any kind. And it tells how you can get a Cluthe Truss on 60 days trial without risking a penny.

Book also tells—in their own words—the experiences of many who have tried this truss—gives the names and addresses of over 4,000—probably some of them right in your neighborhood.

Simply say in a letter or postal "Send me the book." Address us giving our box number—

**Box 109, CLUTHE COMPANY**

125 East 23rd Street, New York City

Don't fail to get this book—the minute it takes to write us may free you from misery and suffering for the rest of your life.

You can try this—the greatest boon to the ruptured world has ever known—without having to risk a single cent of your money. It's a way to get well while working. If you don't find yourself getting better right from the first, then it won't cost you a penny.

### Trusses Like These Are a Crime

**You Don't Risk a Penny**

This is far more than a truss—far more than merely a device for holding your rupture in place. We are so sure it will work wonders for you just as it has for thousands of others that we want to make a Cluthe Truss or Cluthe Automatic Massager especially for your case and send it to you to test—

And won't cost you a cent if it doesn't result in improvement—if it doesn't keep your rupture from coming out—when you are working, exercising, etc., all day long.

Don't judge this by other trusses. This is the only truss guaranteed to hold. And in addition to that the Cluthe Truss provides the only way ever discovered for overcoming the weakness which is the real cause of rupture.

While taking all strain off the rupture, this truss is constantly strengthening the weak ruptured parts—

Does that by automatically massaging them—this soothing, healing massage does for these parts exactly what exercise does for weak arms—soon restores their lost strength—soon makes them so strong that a truss is no longer needed.

### BLAIRGOWRIE STILL TO THE FRONT

Present offering: Shropshire and Cotswold ewes bred to high-class rams; also ewe lambs. In Clydesdales I have choice young mares and filly foals. In Shorthorns are several young bulls of serviceable age. Herd headers of quality.
