A Road's Unfolding.

I had been told of a road that ran for many miles southward by the Alps until it ended at the Mediterranean and I sought it. When I left it, I wondered if there was another such in the world.

It takes you where the fields are small, but are full of folk; where the villages are plastered like swallows' nests, high up on the faces of cliffs, with a church and a castle over all; where the church bells have a peculiarly peaceful note. It is a road of the mountains. It rises as high as eight thousand feet, and day after day progress consists in winding up one side to wind down on the other. It is a road of great mountain peaks, the slope flattens and the road in the ascent of the gray peaks begins with meadows for shrubs. On either hand the tower, frequently clothed in snow, and in front is the saddle-dip of the road is carried. Behind the road and the river run the blue mist, huge dolomite cragges keep the horizon being rarely absent; and that a few yards ahead at the summit you will look upon a wonderful panorama of valley and mountain lying before you. At the point you hear the tinkling bell of a house appears. I hope that for many centuries yet there will be people, who, on these high meadow slopes shut in by the gray jagged peaks, will wish to pause and wander up the mountain paths, to daily by the streams, to see the sun setting and rising, and to feel the awe of the wonderful land of forest and stream and village and mountain lying below, beyond and above.

Not a mile of the hundreds was dull. The contrasts were light and some. Gray, bare mountain peaks looked down upon one of the sunniest and happiest of broad elevated basins. The valley below, where a crowd of people were in the fields lifting potatoes with hoes and oxen and carts, was the sunniest and happiest of the places we went through.

From that we plunged into deep river gorges, the rocks on both sides rising sheer as a stone falls for hundreds of feet above us, the clear blue waters from the snow fields above rushing and foaming down over great boulders, twisting round sharp corners, leaping over stone walls, the rocks through which the road was cut hanging over us. Thus the scenes were unfolded, until at last through a gap in the hills we saw a short straight line on the horizon and a blitter below it. Then we knew we had reached the sea and the end of the road.—J. Ramsey MacDonald, in "Wanderings and Excursions."

Task for the League. Protecting children from undesirable moving pictures seems at first thought to be a rather surprising task for the League of Nations to undertake; but when the interchange of films from one country to another is taken into account the action becomes both logical and commendable. The plan that is advocated is the creation of central censorship boards in the member countries, which shall prohibit the showing of pictures that tend to degrade the minds and morals of young people, and shall encourage those that educate.

The Blue Asbestos. Blue asbestos, which occurs only in South Africa, is a better non-conductor of heat than ordinary white asbestos.

Good for All the Family. It makes them smile—it's sure worth while.

Wiggle's Doublemint Chewing Gum. After every meal.

Poetry. The smile on a baby's face. The perfume of a rose. The laugh of happy children. The Autumn wind that blows. The bright wings of the butterfly. The crimson and gold of the evening sky.

—Scottie McKenzie Fraser, from "Things That Are Mine."

Raising the lid of a new receptacle for cigarettes intended for home use starts a music box to playing a tune.

Minard's Liniment for Backache.

IDEAL Fashions

by Jean DeLille-Johnson

1261

SMARTLY CORRECT.

This season the two-piece frock rules over a wider domain than ever, and on many days, the hours of its reign extend from morning to evening. Therefore, it must be practical, yet combine as well, a semi-formal charm for leisurely events. The model pictured here is a typical example of a sports costume that is smartly correct for either a morning of shopping, or an afternoon of bridge. The jumper shows a high, turn-down collar, joined to a vestee with button trimming, and oddly-shaped patch pockets that support a narrow tie belt. It has long set-in sleeves gathered to deep cuffs at the wrists. The skirt, attached to a body lining, is box-plaited at the front only. No. 1261 is in sizes 16, 18 and 20 years. Size 18 years, requires 1 1/2 yards 36-inch plain material for skirt, with 3/4 yard lining for bodice top; blouse requires 2 1/4 yards 36-inch figured material, and 3/4 yard plain contrasting. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS. Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Pattern Dept., Wilson Publishing Co., 78 West Adelaide St., Toronto. Patterns sent by return mail.

Wily Scotch Angler. Anglers will enjoy the anecdote of a foxy old Scot who, while fishing in forbidden waters, saw the head game-keeper coming his way.

He had been over looking closely at the construction of the new superheterodyne when the Stanley girls arrived. Their mothers had to call them to attract their attention. However, now that they were in for it, the boys tried to make the best of it. Dancing with girls, little or big, was not just in their line at that age. They were good dancers, but then a new superheterodyne was something, too!

Dinner was served and between courses and dances on the porch and light-hearted chaffing of Easton and the rest, the gayety was rising high under the stimulus of one of the most spectacular victories that Rockledge had ever won.

Kennedy and myself had some matters to attend to at the Nonowantuc Club, and had promised to drop in before the evening was over, more especially as there were some problems of radio construction Craig desired to put to Professor Vario.

Between dining and dancing the evening had prolonged itself very pleasantly. Vario had succeeded in getting more dances with Glenn than Rae, and Easton had practically monopolized Ruth to the discomfort of Professor Vario. Reluctantly Ken and Dick had danced with the Stanley girls, until Ken gave Dick the high sign. The boys succeeded in making some temporary excuse, as the radio gave a squeak and Easton was adjusting, that they had better get home, make sure that the high wind that was

springing up had done no damage to the outside aerial. In disgust the Stanley sisters turned to dancing together.

"Say, Dick, I think this wind is going to blow up a storm," winked Ken as they cast about for some other excuse to avoid the dance floor when this one was worn out.

"Think so? Don't you know it? See that flash—and the thunder. That's not far away."

"I guess we'd better go in. Besides, I want to see how this new machine acts with the static. Come on, Dick."

Rain had already begun to fall as the boys scooted for the house. Around in the parking space of the drive someone was busy closing windows of closed cars, putting up side curtains on open cars.

"Ah juzzed by Nature's jax—the boys heard someone in the living room porch say."

The broadcasting of the orchestra in the palm room of the new hotel in the city was seriously interfered with. But although the dance here also at Oldfield was interfered with, the dancers were bound to let nothing break it up. Already a couple were pushing out a victrola and selecting records. Others closed the French windows to deluge of rain.

Had Ken and Dick only been on the east side of the house, just around a wing from where the cars were parked, they would have seen something that would have made their adventurous hearts stop beating.

THE RADIO DETECTIVE

BY ARTHUR B. REEVE.

CHAPTER II. The Superheterodyne Dance. THE STORY SO FAR. Craig Kennedy, scientific detective, interested in the Radio Gang which has been preying on wealthy families in the North Shore colony, has given a box party at the great championship football game at Rockledge University. Present are his nephew, Ken Adams, and his pal, Dick Gerard, Boy Scouts in the Prep School; his niece, Ruth Adams, whose sweetheart, the radio genius, Easton Evans, is captain of the team; Vira Gerard, Ruth's chum, and her fiance, Glenn Buckley; sporty couple, Rae Larue and Jack Curtis; together with Professor Vario, head of the great Radio Corporation, also in love with Ruth. Rockledge wins in the last thirty seconds and a radio dance is planned in honor of Captain Evans.

Now GO ON WITH THE STORY. About the only persons in the great Gerard summer mansion at Oldfield, Long Island, who were not on their toes over the intimate dinner dance given that night in honor of the historic victory of Rockledge over Sheffield and the record run of Easton Evans were Ken Adams and Dick Gerard. That was not over the dinner.

Both Ken and Dick were famous two-handed eaters. It was rather over the dance.

Out in the huge porch living-room, richly furnished in summer wicker, near one of the many French doors that opened into the dining-room of this wonderful millionaire summer place, had been set the big new superheterodyne in a splendid cabinet. There was no need of anyone to attend to the big radio set. Easton himself was there, if anything went wrong. Otherwise almost any of the guests could do it.

The guests were not slow in arriving and Mrs. Gerard was a pleased hostess. Already Craig's sister, Mrs. Walden Adams, had arrived with Ruth. "So glad to see you, Coralie," greeted Mrs. Gerard, then with a significant greeting to Ruth, "I can imagine, my dear, how thrilled you were at the game this afternoon. Vira has told me all about it. Oh! What a beautiful necklace, Ruth, dear! Are those the Adams pearls, Coralie? You flatter our party," she laughed, "but I think I can guess why. With a kind heart she glanced over where Easton Evans could be seen approaching, eyes for no one but Ruth.

Mrs. Adams herself was not above being flattered at the notice given the famous pearls. The necklace had been the betrothal gift in the family and must have had a value of much over a hundred thousands dollars. She herself had on some famous emeralds. As for the diamond necklace that Mrs. Gerard herself was wearing, it also stood for a fortune.

Vira linked her arm in Ruth's. Vira was quite simply dressed that evening. She wore only one small piece of jewelry. That was Glenn's engagement ring. "Sit us down, Vira," said a beautiful necklace, Ruth, dear! Are those the Adams pearls, Coralie? You flatter our party," she laughed, "but I think I can guess why. With a kind heart she glanced over where Easton Evans could be seen approaching, eyes for no one but Ruth.

Professor Vario, his sister Rae, and Jack Curtis, another friend, were arriving. Just as Ken and Dick burst in, followed by a splendid collie.

"Ken!" remonstrated his mother, Mrs. Adams. "I don't believe Mrs. Gerard will appreciate Laddie quite as you do. Don't you think you'd better leave him outside?"

Ken did not argue it, but dutifully called the beautiful collie outside. That was comparatively easy as far as Ken was concerned. But there was a snag in the matter. The collie, Gerard chauffeur, had just arrived with a couple of very sub-dubs, the Stanley girls from across at Crane's Point. It was only then that Ken realized that it was not just in their line at that age. They were good dancers, but then a new superheterodyne was something, too!

Dinner was served and between courses and dances on the porch and light-hearted chaffing of Easton and the rest, the gayety was rising high under the stimulus of one of the most spectacular victories that Rockledge had ever won.

Kennedy and myself had some matters to attend to at the Nonowantuc Club, and had promised to drop in before the evening was over, more especially as there were some problems of radio construction Craig desired to put to Professor Vario.

Between dining and dancing the evening had prolonged itself very pleasantly. Vario had succeeded in getting more dances with Glenn than Rae, and Easton had practically monopolized Ruth to the discomfort of Professor Vario. Reluctantly Ken and Dick had danced with the Stanley girls, until Ken gave Dick the high sign. The boys succeeded in making some temporary excuse, as the radio gave a squeak and Easton was adjusting, that they had better get home, make sure that the high wind that was

springing up had done no damage to the outside aerial. In disgust the Stanley sisters turned to dancing together.

"Say, Dick, I think this wind is going to blow up a storm," winked Ken as they cast about for some other excuse to avoid the dance floor when this one was worn out.

"Think so? Don't you know it? See that flash—and the thunder. That's not far away."

"I guess we'd better go in. Besides, I want to see how this new machine acts with the static. Come on, Dick."

Rain had already begun to fall as the boys scooted for the house. Around in the parking space of the drive someone was busy closing windows of closed cars, putting up side curtains on open cars.

"Ah juzzed by Nature's jax—the boys heard someone in the living room porch say."

The broadcasting of the orchestra in the palm room of the new hotel in the city was seriously interfered with. But although the dance here also at Oldfield was interfered with, the dancers were bound to let nothing break it up. Already a couple were pushing out a victrola and selecting records. Others closed the French windows to deluge of rain.

Had Ken and Dick only been on the east side of the house, just around a wing from where the cars were parked, they would have seen something that would have made their adventurous hearts stop beating.

Someone was sneaking, two figures, in the dusk of the rain, along the wall, until they came to a spot where the telephone wires entered the house. Quickly with a wire-cutter, the connection with the outside world was snapped. Then the figures retreated to the shelter of an ell in the building. There was a burst of nature's fireworks.

"Suppose the lightning blows a fuse—or the power house shuts off the current."

"So much the better. You can see sparks in the dark with an electric bull's eye, can't you? I've a good mind to assist the storm, douse those lights, anyhow." One of the pair had produced a heavy rubber glove and was considering it as he held the wire-cutter in the insulated hand, when there came a sudden deep-lunged bark from the direction of the car.

High School Boards and Boards of Education

Are authorized by law to establish INDUSTRIAL, TECHNICAL AND ART SCHOOLS

With the approval of the Minister of Education. DAY AND EVENING CLASSES may be conducted in accordance with the regulations issued by the Department of Education. THEORETICAL AND PRACTICAL INSTRUCTION is given in various trades. The schools and classes are under the direction of AN ADVISORY COMMITTEE. Application for attendance should be made to the Principal of the school.

COMMERCIAL SUBJECTS, MANUAL TRAINING, HOUSEHOLD SCIENCE AND AGRICULTURE AND HORTICULTURE are provided for in the Courses of Study in Public, Separate, Continuation and High Schools, Collegiate Institutes, Vocational Schools and Departments. Copies of the Regulations issued by the Minister of Education may be obtained from the Deputy Minister, Parliament Buildings, Toronto.

Mock Mahogany.

When desiring to stain light-colored wood a good mahogany color, a method that produces the best results, while at the same time requiring only one coat of the stain is as follows:

Before applying the stain, procure some permanganate of potash. Dissolve this in enough water to make a good rich reddish brown shade, and apply it to the wood with a clean brush. When dry, apply mahogany stain or stain and varnish combined. If a very silky finish is desired, use both stain and varnish, then very gently rub down the varnish with fine sandpaper or powdered pumice, afterward applying a coat of liquid wax as a final finish. This use of the permanganate of potash as a first coat furnishes a good body color.

Sentence Sermons. The Most Unfortunate Man—Always has a chance until he gives up. Never gains anything by self-pity. Never helps his cause by knocking other people. Will always be able to find someone with whom he would not trade places. Is the one who has to provide roosts for the chickens that are coming home. Never meets a worse misfortune than the loss of self respect. Is the one who is enslaved to his own habits, passions and emotions.

June on the Merrimac. Here can't forget his dreary tone, And care his face forlorn; The liberal air and sunshine laugh The bigo's zeal to scorn.

From manhood's weary shoulder falls His load of selfish cares; And woman takes her rights as flowers And brooks and birds take theirs.

The license of the happy woods, The brook's release are ours; The freedom of the unshamed wind Among the glad-eyed flowers.

We walk on holy ground; above A sky more holy smiles; The chant of the beatitudes Swells down these leafy aisles.

Thanks to the gracious Providence That brings us here once more; For memories of the good, behind And hopes of good before! —Whittier.

Flowers and Gems for the Year. January, Snowdrop, Garnet; February, Primrose, Amethyst; March, Violet, Aqua marine; April, Daisy, Diamond; May, Hawthorn or apple blossom, Emerald; June, Rose, Pearl; July, Poppy, Ruby; August, Waterlily, Sardonyx; September, Morning-glory or golden-rod, Sapphire; October, Aster, Opal; November, Chrysanthemum, Topaz; December, Holly, Turquoise.

A BUSINESS OF YOUR OWN. Earn money—and get it every week. Sell fruit trees, flowering shrubs, shade trees, hedging, rare and evergreens. Quick furnished. Old, established firm has an attractive proposition for man or woman of good standing and energetic. Write to D. SMITH & SONS, LIMITED, Ontario.

Delayed by a Wreck. "Jim says he was delayed in getting back by a wreck." "Wreck is right—I saw her."

Minard's Liniment for Burns. Don't put too much faith in logic! Many a man whose girl used to find his shipping necktie and pick lint off his coat thought he was marrying a neat housewife.

NURSES. The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three year Course of Training in nursing, leading to the required education, and degrees of hospital nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and traveling expenses to and from New York. For further information write the Superintendent.
