HUMAN HAIR.—HYPERTOR FLUTE.—This is a composition admirably adapted to the diseases of the hair, and has the particular merit of being pregneed nursly from negetable ingredients, to that its application is perfectly safe. How often do we perceive young persons with hair nearly grey, or afflicted with hairments, all arising from inflummation of the skin of the head, caused by severe study, violent grief, and other mental afflictions. By a liberar use of the Hyperion, it a short time they will find, to their designt, we complete change will nave taken place in the action of the skin, and a rich and tuxeriant growth of hair, of its original color, will shortly follow. Its effects in cleaning the hair from send and dandruff are also ruly wonderful. The Hyperion should be one of the principal appendings to every lady's nind gentitimin's toilet.—See Advertisement.

REDUCED RATES OF PREMIUM.—HALF CREDIT RATES OF PREMIUM.

THE great and decided success which has attended this Institution, has induced the Directors to REDUCE the RATES originally required in British North America, to the ordinary European Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits to Life Assurance at much lower rates of Premium than those of any other Assurance Company t anancting business in Canada.

The Directors have also resolved to extend to British North America the advantages afforded by the HALF CREDIT RATES of PREMIUM which have been so highly approved, and are so generally adopted by Policy Holders in the United Kingdom. The most liberal conditions are likewise offered to the Assured in the limits to which they may proceed by sea or land, to other parts of North America without affecting their Interest in their respective Policies. REDUCED RATES OF PREMIUM-HALF their respective Policies. ERASMUS R. FOSTER.
