Two Significant Ones That Were Se-

At the Fort Pitt foundry, Fort Pitt, Pa., were cast in 1867 for the mon Puritan two twenty-inch guns, which Captain W. C. Wise, then chief of the naval bureau of ordnance, proposed to call Satan and Lucifer. This proposition called forth a protest from the pastor of a Presbyterian church at Pittsburg, who characterized it as "most unseemly, if net implous." His letter was referred by the member of congress to whom it was addressed to the department and finally came into the hands of Captain Wise for reply. In answer he called attention to the foreign custom of giving to vessels such names as Jupiter, Juno, Vulcan, Venus, Juggernaut, Inferno and Luci-fer and Satah to convey an idea of the power of the destructive agent used in battle. These guns, argued the learnbattle. These guns, argued the learned captain, were not intended for peace and the utterance of good will toward men, but to inflict as much mischief and destruction on human beings in time of war as their namesake, the devil, tries to do at all times. He further reminded his clerical critic that a number of clergymen had witnessed without protest his act of "christen-ing" in presence of a large assembly of ladies and gentlemen the first twen-ty inch gun cast for the navy as Beelzebub. However, the argument did not prevail, for religious sentiment was effective in preventing this use of Biblical nomenclature.—Army and Navy

TOUGHS OF PARIS.

They Are Known as "Apaches" and Work In Gangs.

They work in gangs. In the under-world their associations are complete and distinct. Fame has come to them -to the gang of Bebert of Montparno, of Gegene of the Courtille, the Green Cravats, the Costands of the Villette, the Mont-en-l'air of the Batignolles. Against these bands the police war in vain. They wage their battles in open day—for some "mome" that Bebert has stolen from Gegene. A band comes down from the heights of Belleville or of Charonne and raids a peaceful quarthe passenger stabbed through the win-dow and robbed. They prey on the public. Band wars upon band. There are nightly duels on the fortifications or under the bridges—when the Beau Totor meets Poigne d'Acier, knife to knife, in a savage and not unloyal way. Young all, from sixteen to twenty-two, rarely older. Where do they come from? Everywhere. They grow on the pavements of Paris, along the gutthe pavements of Paris, along the gut-ters—foundlings or deserted children, sons perhaps of that laboring class which is on the edge of crime and beg-gary. The life of the Apache is short, but for every one sent to the jail or the guillotine two stand ready at the door of the slums. They used to haunt the dest of the Paris Lingston. doer of the slums. They used to haunt the den of the Pere Lunette.—From "The Slums of Paris," by Vance Thompson, in Outing Magazine.

"I find the trained nurses brave enough in most cases of contagious dis-esse," said a Brooklyn doctor, "but there is one thing at which they bate." "What's that," asked a friend."

"smallpox?"
"No; cancer. They have all the untrained woman's horror of that dis-ease. The most faithful of them will go without an engagement for weeks rather than take a cancer case. Tet the peril is slight compared with what they face almost without thought."

"Isn't it contagious?" "A malignant case is if a scratched hand is brought into contact with the cancer. Three cancers out of four, however, are not malignant and can be dressed without gloves safely. The trained nurses balk at all of them."

Intoxicated Midge Flies.

"What a pity you are engaged so young, my dear!" said the maid who was beginning to carry weight for age. "You will never know what fun it is to refuse a man." "No. I suppose not," rejoined the fair debutante, "but you can't imagine how much fun there is in accepting one."

CARS OVER NIAGARA GORGE.

Sensational Accident—Train "Buck-led" When Engine Came to Stop Niagara Falls, Ont., June 17.—A G. T. R. crew had an exciting mixup on the big steel arch bridge early on Saturday. The men left the Lehigh Valley yards, on the American side of the river, with 41 empty box cars for the Canadian side. The Lehigh has no night yard inspector, and the accident that followed is attributed to that.

that.

A brake-beam on a car about the centre of the train was dragging. It ran some cars off the rails, and there was a general bump, bump, bump on the ties. This was noticed by an Eric engineer, who "whistled them down." Brakes were applied by the G. T. B. engineer, and the sudden stopping of the front of the train with the momentum of the cars in the rear caused the centre cars, which were off the mentum of the cars in the rear caused the centre cars, which were off the track, to buckle out and go over the edge of the bridge. Two of them shot out clear of the lower storey and plunged headforemost into the Niagara, 250 feet below, which at this point has a very strong current.

A third car stopped on the edge, then went over, striking the railing of the lower storey. When the railing was struck the car turned a complete somersault.

Three daugnters of Mr. McDonaid went out with their hired boy in a flat-bottomed punt for a row on the river, on which the farm is situated. After the boat had been pushed out a short distance from shore it upset in about nine feet of water.

The youngest child, 12 years old, managed to climb upon the bottom of the upturned punt and grasp her eldest sister, aged 22, and at the same time had presence of mind enough to signal for fielp.

Before help came, Justina, aged 20, and the hired boy, were drowned.

At Fifteen Point, Prince County, Jos. McCurdy and a companion named Arsenault were returning from the lobster-fishing ground when their boat was struck by a squall and capsized. McCurdy went down.
