THE GREAT SOUTH AMERICAN

Stomach Liver Cure

The Most Astonishing Medical Discovery of the Last One Hundred Years. It is Pleasant to the Taste as the Sweetest Nectar. It is Safe and Harmless as the Purest Milk.

This wonderful Nervine Tonic has only recently been introduced nto this country by the proprietors and manufacturers of the Great outh American Nervine Tonic, and yet its great value as a curative gent has long been known by a few of the most learned physicians ho have not brought its merits and value to the knowledge of the

This medicine has completely solved the problem of the cure of indigestion, dyspepsia, and diseases of the general nervous system. It is lso of the greatest value in the cure of all forms of failing health from Thatever cause. It performs this by the great nervine tonic qualitie which it possesses, and by its great curative powers upon the digestive organs, the stomach, the liver and the bowels. No remedy compare with this wonderfully valuable Nervine Tonic as a builder and strengthner of the life forces of the human body, and as a great renewer of a proken-down constitution. It is also of more real permanent value in the treatment and cure of diseases of the lungs than any consumption remedy ever used on this continent. It is a marvelous cure for nerv oushess of females of all ages. Ladies who are approaching the critical period known as change in life, should not fail to use this great Nervino Fonic, almost constantly, for the space of two or three years. It will carry them safely over the danger. This great strengthener and curative is of inestimable value to the aged and infirm, because its great energizing properties will give them a new hold on life. It will add ten or fifteen years to the lives of many of those who will use a half dozen

Nervine Tonic. NERVOUS DISEASES.

As a cure for every class of Nervous Diseases, no remedy has been able to compare with the Nervine Tonic, which is very pleasant and carmless in all its effects upon the youngest child or the oldest and most elicate individual. Nine-tenths of all the ailments to which the human amily is heir are dependent on nervous exhaustion and impaired diges-When there is an insufficient supply of nerve food in the blood, a eneral state of debility of the brain, spinal marrow, and nerves is the esult. Starved nerves, like starved muscles, become strong when the ight kind of food is supplied; and a thousand weaknesses and ailments lisappear as the nerves recover. As the nervous system must supply all the power by which the vital forces of the body are carried on, it is the irst to suffer for want of perfect nutrition. Ordinary food does not conain a sufficient quantity of the kind of nutriment necessary to repair the wear our present mode of living and labor imposes upon the nerves. For this reason it becomes necessary that a nerve food be supplied. This South American Nervine has been found by analysis to contain the essential elements out of which nerve tissue is formed. This accounts for its universal adaptability to the cure of all forms of nervous de-

S. HENRY, in Am. Ag. As swamps are mostly full of Our Fall and Winter Stock water it is not so easy to dig out the muck as if it were dry. But in the fall months it is drier then at any other season of the year, and then is he time to go to work. I have taken out hundreds of tons of muck for use in the stables as litter and absorbents, and for making composts, and in a few years the manure hus made, with that from the cows and borses, with some pigs to do he turning over, made a poor sandy Ladies Cloaks Cut and Made aim a dark loam, that g ve hirry-The drained hand became a verdant mendo , the di ches were filled with wa er c es-, that sold in the winter when protected by sashes A peck asket was filled from a single square foot, and among the water cress Newcastle, Oct. 9, 1893.

At first it required some planning o dig out this muck when the swamp was five feet deep above the clay ottom, but the difficulty was overcome. A few boards were driven throug's the muck and into the clay, and supported by a beam fastened down by stakes on the surface; by this a dam was made. Then the muck was dug out to a space twelve feet long by eight wide. As the muck was taken out and thrown on the bank the water was dipped out by the grain scoop used for the dgging, and the man, with a pair of rupher boots, worked comportably.
