Labradorite

Always we have prided ourselves on the quality of our Labradorite and refused to place on sale stones that did not do credit to the peculiar beauty that is its chief charm. We have now received the first samples of our new stock and they fulfil in every way our ideas of what Labradorite should really be like when made into jewels.

Specially selected and extra well polished stone made into an assortment of Pendants—Bean, Oval and Square shape are the chief items in our new selection.
