proportions of a real disaster. The lava stream, whose path crosses the railway line circling the volcano, is approaching the railway stations to the north, and especially threatening the depots of Molo and Alcantara, which were abandoned today.

Squads of laborers were at work today taking up the railroad tracks and removing all transportable material to places of safety, with the idea of minimizing the losses.

The entire crest of Mount Etna appears to be in a state of ebuilition. An exact count of the number of fissurers is impossible, because of the smoke which shrouds the whole mountain, but there seemed to be more than thirty openings, all beiching smoke and lava.

The opening and defendency was packed to the doors. The fact that Hon. Clifford in Lond for sixteen, because it has to world competition.

ducive to the prosperity of Canada to have one hundred million bushels of wheat diverted from Canadian railways. Dr. Macdonald quoted Sir William Whyte, to the effect that in ten years Saskatchewan alone will produce enough wheat to supply Great Britain three times over. Sir Do ald Mann is not the slightest bit afraid of competition. If the American roads will carry one hundred million bushels cheaper it will not smash the empire.

A great problem was the one which baffled Messrs. Borden, E. B. Osler' and Sir James Whitney; how can reciprocity benefit the farmer and benefit the consumer? These gentlemen have forgotten that the agreement has two sides, that two duties are knocked off. Thanks to certain gentlemen the farmer at present receives six cents a pound for hogs, while the consumer in Toronto pays twenty-five cents, the same identical bacon being sold in London, Eng. for sixteen, because it has to face the world competition.

### ENGLAND OUT OF WATER

Prolonged Drouth Causing Great Incon-venience to Farmers. London, Sept. 13.—The prevalence of holera in certain continental coun-

cholera in certain continental countries has caused increased precautions to be taken by the British port authorities. Extraordinary vigilance is being exercised regarding the possible arrival of passengers from any infected a result of the prolonged drought, water is entirely absent, and supplies thereof are being taken around in carts to the inhabitants.

Parmers are not only without water for their stock, but are finding it almost limpossible, owing to the total absence of grass, to obtain enough food for their animals to keep them alive.

The root crops are an entire fail-ure, and the prospect for stock-keepers during the coming winter is a grave one.
