BAY CITY, Mich., March 4.—Rose Coricania, aged 18, attempted suicide Thursday night by drinking a large quantity of whisky and quinine, thinking it was poison. The stuff made her very sick, but she will recover. The girl came here from Mitchell, Ont., to visit friends some mouths ago. It was the old story of love and betrayal. She gave birth to a child six weeks ago. The Poor Commissioner found a home for the little one but a few days ago. Rose wanted it back and was given a ticket to her home. The girl has been suffering from mild insanity since her troubles commenced, and her relatives at Mitchell have been notified of her condition.

New York, to-day:

New York, March 4.—To-day's stock market closed with something of a rally, attributable chiefly to an expectation on the part of the street that President Cleveland's message would be a buillish document. The rally, however, was in the face of a bank statement, which, reflecting last Wednesday night's conditions, shows a loss in surplus reserve of nearly \$3,000,000, with a loan decrease approaching \$6,000,000, and a decrease in deposits of more than \$10,500,000. This statement is certainly bad enough, but it does not reflect the worst features of the situation. As a matter of fact since Wednesday night New York banks have lost \$4,000,000 in reserve more than the statement shows. Next week gold shipments on an enormous scale will take place. Over \$7,000,000 are already engaged for export. High rates for money may cut this total down somewhat, but high rates for money are not encouraging. Recent blizzardy weather out west is playing havoc with railway earnings and pushing up operating expenses tremendously. The short interest is not so large as it was earlier in the week. Anything like a vigorous drive will be likely to knock quotations down the coming week. The time does not yet seem ripe for free and easy investments on the long side.

Many persons on seeing the machine, or an illustration of it, will condemn it from sheer prejudice, saying: "Oh! It is not a key machine—it can't be any good. Anything but a key machine is a toy," without in any way looking into its merits. Although this is not a key machine, yet it is capable of turning out work not only equal to but bet er than any key machine yet invented, and more astonishing still is the short space of time occupied in writing. This is no idle boast and we are prepared to prove our assertion to any one who will favor us with a visit.
