

NEW YORK STOCK MARKET.—April 22, 1899.

NEW YORK EXCHANGE.

SUGAR ADVANCES—B. R. T. FIRM—
BANK STATEMENT SATISFACTORY
STOCKS DULL.

New York, April 22.

The London market is dull and somewhat below our parity. L. & N. is active and under some pressure on account of high price touched in New York yesterday. It appears that the transfer of the Liggett and Meyers Co. to the Continent Tobacco has now become an accomplished fact, the most interesting thing about the matter to Wall Street is, that A. Houseman & Co. are bringing suit for their commission, they having conducted the sale, and consequently the price paid to Liggett & Meyers has been revealed as being something over \$5,000,000. The price paid by the Con. Tobacco is something like \$19,000,000 on stock, leaving a handsome profit to some one.

It is said this morning but not officially, that the Monon Route has been acquired by Vanderbilt interests. This has been an open secret in the Street for some time. Yesterday's strength in Southern Ry. and L. & N. was largely due to manipulation, but the manipulation was undertaken on the understanding that the prospects of both roads were extremely bright, and that the earnings of both during the summer were expected to show substantial increases over those of last year.

A favorable bank statement is expected an increase in Surplus Reserve is almost certain, a decrease in Loans is probable, and consequently a decrease in Deposits is likely. The outlook seems to be for rather a narrow professional market, as the public are not prepared to enter on any large speculation, pending news regarding the crops.

It is true that the week has witnessed some liquidation of accounts, but they were purely speculative. The rest of the selling has been by bears whose contracts must be covered later. In the meantime, while there has been no general buying demand, there has been a quiet but steady picking up of stock for actual investment holding. Government bonds are selling at their highest prices.

There was an unexpected development of weakness in the latter part of the foreign exchange market yesterday, the demand for remittance falling much below what had been looked for. This is all the more singular or significant when considered in conjunction with the further weakening of money rates.

It is true that the available supply of loanable funds has been increased in New York by the arrival of money attracted from other centres by the higher level of rates.
