

THE 'SANITARY JOURNAL!'

DEVOTED TO PUBLIC HEALTH & PREVENTIVE MEDICINE.

"To prevent disease is the most important aim of the science and art of Medicine," says SIR WILLIAM JENNER.

The purpose of the SANITARY JOURNAL is to diffuse a knowledge of Sanitary Science, of the Causes of Diseases and the Means of Preventing or Removing these Causes. In short, to discuss all questions pertaining to Public Health and Individual Hygiene.

Sanitary Science is fast becoming the most important branch of Medicine. The more the attention of Physicians is turned to the development of the Science, and the practice of the art of Prevention, the more will they, as well as the public, be benefited; the greater will be the service rendered by the former, and the greater the pay, while the practice will be easier. The public can afford to pay much better for Prevention than for Cure. All who take an interest in the future well-being of the Profession should aid in the development of Sanitary Science.

The aim of the Publisher is to make it specially useful and interesting to Medical men.

Biometry—the measure of life—will be made a special feature in the SANITARY JOURNAL, which will render it valuable to all connected with Life Insurance business.

Contributors to past Numbers of the Journal:—Dr. Joseph Workman, Dr. Wm. Marsden, (Quebec,) Dr. Canniff, Dr. Berryman, Dr. Oldright, Dr. George Wright, and others.
