E. NORTH'S PORTLAND CEMENT, CONCRETE, STONE CULVERT and SEWER PIPES are made from materials that improve with age—in the ground and in the water. These pipes extract the minerals from the water and the gases from the air, closing the pores of the pipe and becoming more dense, the color changing to that of iron, and ringing like metal. The longer they remain in the ground the greater their strength becomes, eventually becoming as hard as stone. They are considered by the leading men of Western Ontario to be superior to anything now in the market for culvert or sewer purposes. The townships using them find their work finished as they go. The work done permanent, and will relieve them of the liability of law costs arising from damages caused by perishable culverts, etc.

AT THE WESTERN FAIR, 1892. THE CONCRETE, CULVERT AND SEWER PIPE EXHIBIT WAS AWARDED SILVER MEDAL.
