Prof. Coleman Makes a Trip a dept. to Sudbury

Remarked, on Seeing the Fuel Vein, "Extraordinary!" "Wonderful!"

He then repaired to the smithy forge, where a fire was started with coal from the vein. In about fifteen minutes the wood used to kindle the fire was consumed and the coal, while under blast from the bellows, gave out extreme heat, with a clear, red glow and very slight perception of sulphur fumes, and when not under the blast it gave intense heat and burned with a slight yellowish green flame on top and bright clear red heat below. It burns very slowly, keeps up a steady heat and deposits a pinkish colored ash, clean to the touch. At the forge a piece of the vein matter that had been put on one side as a cull material, under the impression at cull material, under the impression that on account of its hardness it contained a large percentage of slate and rock, was shown to Prof. Coleman, and he remarked that it could and rock, was shown to Prof. Cole- Tel. 3910. man, and he remarked that it could not be as suggested, as it was too light in weight. This was broken up and fed on the smithy fire, resulting in the discovery that it was coal of a finer grain and its heating powers much greater than that of the coarser

Shortly after leaving the mine Prof. Coleman asked if the coal had been tried in base-burner stoves, and, being answered in the affirmative, asked Mr. Gordon why he did not put on a force at once and get out coal sufficient to supply the wants of the people of Sudbury and district. Mr. Gordon replied that he had already a standing order for all he could supply in Sudbury at \$6 per ton, but the roads now being in very bad order he had decided to operate a diamond drill and further prospect to determine the extent of the deposit. The party returned to Sudbury, arriving about 6

Memphis, Oct. 31.—Both parties are laying claim to Tennessee, the Republicans by a majority of 8000 to 15,000, the Democrats from 30,000 to 50,000. As between ex-Governor Taylor and G. N. Tillman, Democratic and Republican gubernatorial candidates, respectively, the situation is considerably mixed. The amount of gold standard Democratic strength that will be deflected to the Republicans is a quantity as yet impossible to estimate with any degree of accuracy, and so it is, too, of the sliver Republican vote coming to the Democracy. Democracy.

Atlanta, Ga., Oct. 31.—The result in Georgia is not problematical. The Populists have withdrawn their electoral ticket in Mr. Watson's own state. The Bryan and Sewall electors will receive not only the practically solid vote of the Democrats, but also a great many from Populists. It is not believed that Palmer and Buckner talent in this state will poll as many as 5000 votes. McKinley will get the solid Republican vote of the state. It is estimated that the Democratic plurality will approximate 50,000, the Democratic state ticket receiving 56,000 majority in the October election. There seems to be no doubt that every Democratic nominee for Congress will be elected.

Hot Fights at Chicago.

Chicago, Nov. 1.—Bryan and McKinley forces met in West Madison-street last night. Four men were injured. The trouble necessitated the calling out of extra squads of officers until a whole company was detailed within two blocks bounded by Desplaines and Halstead-streets. The injured are: Hugh Murray. Richard Porter. E. J. Proctor and Roger Converse. The trouble began at 6.30 o'clock. The headquarters of the 18th Ward Sliver Democrats and Republicans are nearly opposite ach other, and the crowds which hang about both places came together three times before midnight. Frederic cables from London to The Times:

"Since Dillon's mock convention in Dublin there has been an absolute hull in Irish politics. This is quite the best thing that could have happened. It is really disheartening, however, to find a good man like Archbishop Walsh of Toronto breaking in upon the beneficent hush with such a speech as that reported by cable. He did not attend the convention himself, and it is evident that he has been grossly misled as to its character and spirit, and as to the attitude of the Irish people toward it. Especially does the Archbishop misprehend altogether the position of Healy and his friends toward the Parliamentary party. It is wholly false to say that they broke a pledge or assalled their colleagues with calumny. They merely declined to be parties to the ruln of Ireland's cause by a little gang of fincompetent and dishonest plotters, who got hold of the party treasury and openly used its funds to fatten their own heelers and to drive respectable and intelligent men out of Irish politics. Mr. Farini began a successful career as a tight-rope walker, and, becoming a showman, soon earned for himself the title of the "P. T. Barnum of England." He caught the mining fever and his speculations in the South African diamond fields reaped him a fortune which is estimated at several millions. It goes without saying, therefore, that Mr. Farini's opinions on Canadian mines should carry weight.

Cornwall, Ont., Oct. 31.—Edward Bouker, who escaped from Cornwall jall, was recaptured, brought back and tried and sentenced by Justice Ferguson to ten years in the Kingston Penitentiary at hard labor.

At the expiration of three months he is to receive fifteen lashes, at five years fifteen more, and within three months of his release fifteen more. His Lordship would not accept the plea of the prisoner of guilty of assault on a little girl, but ordered the evidence to be brought on. He said it was one of the most brutal criminal offences he ever heard of.

New York, Nov. 1.-Mr. Isaac N. Ford cables from London to The Tribune as follows:

election in the United States is frightening English investors. The market for American securities has been weak and wellnigh paralyzed this week. The spectacle of Bryan insti-gating a Socialist revolution in one State after another has dazed and alarmed the best friends of America in England, and has drawn from them expressions of apprehension respecting the permanency of Republican institutions in the New World.

TALK OF CIVIL WAR. "While writing these sentences in a London club house I have been interrupted by a Conservative Englishtion in America on Tuesday might not lead to a civil war. This is one of the commonest comments made in London clubs upon the impending crisis. It is assumed that a canvass ending, as the English think, with section arrayed against section and class against class, and with the electorate at a white heat of excitement, menaces the existence of the nation. One of the most cautious business men in the city remarked to me yesterday: It is more than an issue of finance and morality. The question to be determined on Tuesday by the Americans is whether the United States will remain a nation, or whether it will be given over to political anarchy, socialism and organized warfare upon property.
