

of the Bowels, Costiveness, and many other diseases, arise from a disordered state of the system.

Whenever any pain or uneasiness is felt, especially after eating, take one or two full doses Colby's Pills, and one or two daily for a few days, until the unpleasant symptoms disappear.

IMPURE BLOOD

The Blood is the Life of the system, and upon its purity depends the health of the body.

The symptoms of impure blood are dull heavy feelings, headach, loss of appetite, &c.

In cases of this kind, immediate and permanent relief may be obtained by a free use of "Colby's Pills," as by their peculiar combination they restore the stomach and bowels to their proper tone and vigor, and purify the blood.

SUDDEN COLDS

Are, (by neglect) often productive of the most fearful diseases. In all cases of this kind immediate resort should be had to Colby's Pills, as, by regulating the stomach and bowels, serious results may often be prevented. *Do not think these Pills have no efficacy because you are not violently purged and sickened.* Such purgation and Akening are entirely unnecessary, and leave the patient in a far worse state than before. It is one of the principle excellencies of these Pills that such effects are avoided. They are intended to act in harmony with, and to assist nature. By regulating and strengthening the bowels, and by removing impurities from the blood, they impart tone and vigor to the system, enabling the different organs of the body to perform their various functions, thus curing disease without poisoning the system with deleterious drugs.

I have at my command numerous Testimonials from respectable persons, who have used these Pills with great advantage, but I do not deem it advisable to insert them.

Such Certificates from unknown persons are justly looked upon with suspicion.

They are easily procurable by every Quack, and if not procurable, they may be easily fabricated.

It will be at once perceived that these Pills are not recommended as a cathartic. They are simply designed as a safe and reliable family medicine, at once mild and efficacious, which may be taken in all cases where laxity can be borne, without injury, and which, in most cases will produce exceedingly happy results.

I have no hesitation in saying, that, as a universal Pill for digestive difficulties, they cannot be excelled; and such is the unequivocal testimony of the numerous medical men to whom the formula has been submitted.

M. F. COLBY, M. D.
